

## Preliminary Notes

EOPLE planting for the first time often have trouble in selecting plants suitable for the conditions under which they wish to plant. In my catalogue I have endeavored to give descriptions as clearly as possible; but even after thirty years of experience I find that a descriptive catalogue cannot give information that will be clear to all. I solicit the correspondence of all who find it difficult to make their selections, and assure you that I will be pleased to be of assistance.

THE WILD FLOWERS have been my specialty, and after years of selection I have now established only such kinds as are most desirable. People who wish to beautify ravines, shady corners by the house, or banks by the brook, will find selection of wild flowers just what is needed. Sometimes people have woods in which they wish natural planting-the wild flowers are the sorts that can produce the purely natural effect. Trilliums, Jack-in-the-pulpits, Snake-roots, Blood-roots, Hepaticas, and wood lilies are the kinds that grow around the old homestead, and if planted on that new cstate will bring back the memories which are so dear.

FOR THE VERY DRY PLACES in the open sun we have a collection of sedums which will give the best of satisfaction. These plants will grow in hot, dry places where other plant life has a hard struggle for existence. The low growing kinds, in some cases, cover the ground in a short time, and form a mat of green.

HARDY ORCHIDS are among the choicest of our native flora. As a rule these plants need moist ground; some of the Cypripediums will, however, do well in common garden soil, if given shade. Don't fail to have some of these on your list when you order.

HARDY FERNS are becoming an important factor in our modern planting. These plants are easily grown; an amateur can have fine success in growing them. They can be planted in the spring or early fall. Hardy ferns are being insed in quantity for mass planting, and selections can be made that will suit almost any location. Many times there are corners by the house where the sun does not strike; such places as a rule will not foster ordinary plants. FERNS can be selected that will give perfect satisfaction. Our fern trade is extensive, and we are in a position to furnish them in quantity. I will be glad to make special quotations on large amounts.

POSTPAID. We will deliver at any post-office in the United States, the Ferns, Hardy Perennials, Bog and Aquatic Plants and Orchids given in this Catalogue, at prices named, but this offer does not include Trees, Shrubs and Roses.

Parties often desire somewhat heavier stock than can easily go by mail. We can usually accommodate them, and shall be glad to do so when our stock will warrant it, if they will pay the express charges. We can often make selections of extra-strong clumps when such are desired at a reasonable advance in price from Catalogue rates.

I will not fill orders at dozen rates when twelve separate kinds are ordered for a dozen. Six of one variety will be sold at the dozen rate.

TREES, SHRUBS and ROSES. These are too heavy for the mail, but they will be delivered at the express or freight office here, the purchaser paying transportation charges when goods are received. When stock can be packed in small boxcs, no charge is made, but, when larger boxes or bales are used, a charge will be made to cover actual cost.

AZALEAS. I wish to call your attention to my stock of Azaleas; especially the native white. I can make prices on this variety in large quantities. I also have a large stock of the Hardy Barberry (the unexcelled hedge shrub). I can make prices on this in large quantity. Fragrant Sumach, Native Roses for large mass plantings.

Have plants shipped by express when practicable.
EXPRESS RATES. The express company here (Adams) offers to carry nursery stock at a reduction of 20 per cent discount from the regular rate. Thirty-five pounds can be sent to Boston or New York for 35 cents, and 1 cent for each additional pound; 100 pounds gocs for 80 cents. Eleven pounds can be sent to Chicago for 35 cents, and 3 cents for each additional pound. See that the red tag is on all express packages; this is a reminder that it is entitled to a discount of 20 per cent from the regular cxpress rates.

REMITTANCES may be made by Registered Letter, by Post-Office Money Order on Southwick, Mass., or by draft.

CERTIFICATE OF INSPECTION. A copy will be sent with each shipment.
See third cover page for Collection of Flowering Plants.

# Hardy Fern and Flower Farm 

EDWARD GILLETT, Proprietor

## SOUTHWICK, MASSACHUSETTS

There is so much inquiry for plants to grow in certain positions, like dark, shady, wet, or dry places, or open sun, that we have so marked the several kinds in this Catalogue, designating eaeh kind by a speeial sign. This will enable our customers to make their seleetions without reading pages of deseriptions.

* All plants desirable for growing in dark, shady places, shut out from the sunlight, are marked with this sign, 因. Very few of the old garden plants will thrive in sueh a plaee, but most of the Hardy Ferns of New England, and several of the best wild flowers are at home here; the little nook by the poreh, shut away from the sunlight, the deep shade of the great lawn tree, where even grass will not grow, the wooded bank, are all plaees to beautify with this elass of plants.
$*$ This sign means that the plant is adapted for the low, wet places where sedges erowd out the grasses, and bulrushes thrive; Lobelias, Marsh Marigolds, Iris, Sarraeenias, Mentha, Lythrum, ete., find here a congenial home.
4: All the old garden plants, those to grow in beds or borders, like Campanulas, Aquilegias, those best suited for open, sunny plaees, desiring, for the most part, a moist, yet well-drained soil in the open sun, are marked 0 .
* Plants marked with $a \not a$ are adapted for dry woods. Many of the Asters and Goldenrods will thrive here. Most of them eome in late summer, when other flowers are passed; they do quite well, also, in dry, open places.

Oceasionally will be seen two of the signs against the same plant; this means that the plant seems to do equally well in both positions.

Polypodium vulgare (see page 13)

## Hardy Ferns

The Ferns of New England (about forty kinds) take as readily to cultivation as the common garden flowers. While flowers require a sunny place, Ferns delight in some shaded nook shut out from the bright sunlight by buildings or trees; they can also be grown in boxes or pans on the porch, in the house or under trees, any place that is shaded; but are not suitable for house culture in winter, for that is their time of rest; they will not respond to any attention given in winter unless it be near springtime.

Soils. We grow the greater share of these Ferns in a moist and sandy loam soil, well drained, under a covering of boughs, high enough to work under and get among the beds. In making the beds, we use for the smaller Ferns a good sprinkling of leaf-mold and a little well-decayed manure made very fine; this is thoroughly mixed with the soil, and after the Ferns are planted, a little leaf-mold sprinkled around the plants tends to keep the soil light and porous. Raising the beds 2 or 3 inches, a little higher in the center, gives better drainage and allows the surplus water to drain off. The larger and stronger kinds thrive in almost any soil, shaded and not too wet; they require no special care or soil, yet will respond to cultivation rcadily. Order by number if you wish.

Dicksonia punctilobula growing under our fern bower

Give a good mulching of leaves in winter. Our hardy Ferns can be planted at any time when not in full growth, in early spring as soon as the frost is gone, and any time in autumn until the ground is frozen.

Unless noted, plant an inch or so decp. A few of the evergreens need to be planted with the crowns or new buds just at the surface or above. Note is made of all such.
1 ADIANTUM pedatum (Maidenhair Fern). * The most graceful of all our New Eng-

Adiantum pedatum land Ferns and very easily grown in rich, moist, shady places; about a foot high. This, like nearly all the Ferns, needs good drainage. It will establish itself in one scason, and increase in strength year after ycar. Plant an inch deep and about 1 foot apart for massing. Clumps, 25 cts . each, $\$ 2.00$ per dozen. Sce illustration.

2 ASPIDIUM acrostichoides (Christmas Fern). 図 An cvergreen specics, about a foot high, with deep green fronds simply divided. Although it is one of our common species, it is a pretty one, and easily grown in shade, in good garden soil, well drained. A good Fern for planting with other sorts. Plant with the new crowns or buds just at the surfacc. 20 cts. each, $\$ 1.50$ per doz.

Clump of Aspidium Goldianum and Asplenium angustifolium (see pages 5 and 6)
3 Aspidium aculeatum, var. Braunii (Priekly Shield Fern). 因 \& The leaves are evergreen and shining, and when well grown it is one of the finest of our native Ferns. It is found along the mountain brooks, but takes quite readily to eultivation in the shaded corner where the drainage is good; benefited by a little leaf-mold. Grows about 12 to 18 inehes high; plant 1 foot apart, with the new erowns just at the surface. 25 ets. eaeh, $\$ 2.00$ per doz.

4 A. cristatum (Crested Wood Fern). * This is a more eommon evergreen Fern, found in wet, springy plaees; about a foot high. A moist, shaded place is suited to its growth. Gives a deeided eoloring to the Fernbed; plant about 8 inehes apart in front of the tall sorts. Responds to eultivation with the new erowns not eovered. 20 ets. eaeh, $\$ 1.50$ per doz.
5 A. cristatum, var. Clintonianum. 因 In every way larger than the preeeding. A showy Fern and easy to grow in any shaded spot; it will thrive in quite wet plaees.

Aspidhum munitum (see page 5)

Aspidium cristatum，var．Clintonianum，continucd 2 to 3 fcet high．Plant 18 inches apart． 25 cts．each，$\$ 2.00$ per doz．
6 A．Felix－mas（Malc Fcrn）．因 A very beautiful and hardy Fern，green all the year． Rare． 1 to $1 \frac{1}{2}$ feet．Plant in a rich，shady place， 1 foot apart，new growth or crowns just at the surface． 30 cts．cach．
7 A．Goldianum（Goldie＇s Wood Fern）． $\operatorname{*i}^{*}$ This species often grows 4 feet high，with fronds a foot or more wide．Broadly ovate in outlinc．Where a single specimen is desired that has grace and bcauty in its bearing，we would rccommend Goldie＇s Wood Fern．This fcrn is not often seen in New England．It is easily grown，and is per－ fectly hardy．Plant an inch dcep and 18 inches apart for massing． 25 cts．each， $\$ 2.00$ per doz．See cut of this growing with A．angustifolium．
8 A．marginale（Evergrecn Wood Fern）．＊Onc of our pretti－ est cvergrecn specics．Fronds 1 to 2 feet in length， 3 to 5 inches wide，thickish，and of a deep green color．It delights in rich shady，rocky hillsides， yet it thrives in my garden with Maidenhair and other kinds．Plant this fern with the crown an inch above the surface，and a foot apart． 20 cts．each，$\$ 1.50$ per doz．
9 A．munitum．因 An cvergreen Fern from Oregon，resembling A．acrostichoides，but fincr； dcsirable for rockwork in shade．Sce illustration on page 4．Plant with the crown just at the surface and about 9 inchcs apart． 25 cts．each．
10 A ．Noveboracense．（Ncw York Shield Fern）．因 A slender spccies，about a foot high，

Aspidium acrostichoides（see page 3）

Aspidium aculeatum，var．Braunii，as it grows under our fern bower（see page 4）

Aspidium Noveboracense, continued.
in moist, shady woods, with fronds 3 to 4 inches wide. Pale green. Fine for massing. Plant 9 inches apart. Cover an inch or so. 15 cts. each. $\$ 1.25$ per doz.

Aspidium cristatum var. Clintonianum (see prige 4)

11 A. spinulosum (Spinulose Wood Fern). ** A very pretty evergreen species, about 15 inches high, with finely dissected fronds about 4 inches wide. Quite a prominent Fern in moist woods and on shaded banks, where it becomes easily established when planted. It does quite well in the Fern-bed planted well back. Plant 18 inches apart, with the new buds above ground. 20 cts . each, $\$ 1.50$ per doz.
12 A. spinulosum, var. dilatatum. 因 Similar to A. spinulosum, but with broader fronds. This is usually found in moist, cool, shaded places in beds of leaf-mold well toward the top of our higher mountains. Give it an abundance of this black wood dirt in planting in the bed. 18 inches apart; same as above. 20 cts. each, $\$ 1.50$ per doz.
13 A. Thelypteris (Marsh Shield Fern.) $\otimes A$ foot high, with fronds about $2 \frac{1}{2}$ inches wide. We see this growing wild in large beds where it is quite wet, in open, sunny places. It can be cultivated in moist, open places, and is benefited by adding leaf-mold. 20 cts. each, $\$ 1.50$ per doz.
14 ASPLENIUM angustifolium (Narrow-leaved Spleenwort). 困 A charming Fern, with light green, graceful fronds. Do not miss it in making up your list. Grows 1 to 3 feet high, with simply divided fronds; these divisions are 3 to 4 inches long. Its home is in rich, shaded places, where it is quite moist. It takes quite kindly to cultivation in the Fern-bed. Set well back, about 18 inches apart. 25 cts. each, $\$ 2.00$ per doz. See cut.

15 Asplenium ebeneum (Ebony Spleenwort). \& Usually 6 to 15 inches high. Found growing among the roeks and along eliffs in dry, rather sunny places. Suited for roekwork. In planting in the front border of Fern-beds, give it a little leaf-mold, and plant about 8 inches apart; don't cover the new buds. 15 ets. each, $\$ 1.25$ per doz.

A bed of Aspidium Noveboracense (see page 5)
16 A. Felix-fœmina (Lady Fern). ** A large, handsome Fern, 2 to 3 feet high, with fincly eut foliage. Plant in a moist plaee, in sun or shade, good, rieh soil. This is a good Fern to grow as single specimens, or it ean be set 18 to 24 inehes apart at back of Fern-bed. One of the very best for general culture. 15 ets. eaeh, $\$ 1.25$ per doz.

Asplenium angustifolium (see page 6)

17 Asolenium Trichomanes (Maiden-hair Spleenwort). * A delicate little Fern, with narrow fronds 3 to 6 inches long. This, although found up among the eliffs, adapts itself to the small rockery, where it does exceedingly well; also in the Fern border. This is one of the small evergreen Ferns benefited by a good allowance of leaf-mold. Plant about 8 inehes apart, with the crowns brought to the surface. Clumps. 25 ets. cach, $\$ 2.00$ per doz.

18 A. Thelypteroides (Silvery Spleenwort). 柬 Fronds 2 to 3 feet high, by 6 inehes wide. In moist shades. A good, thrifty Fern, well deserving a place in the Fernbed, well back. Any good garden soil. Plant 1 foot apart. 20 cts. eaeh, $\$ 1.50$ per doz.

Asplenium Trichomanes
$1^{1 /}$ BOTRYCHIUM Virginicum (Moonwort). 因 About 1 foot, divided into two segments above the middle. one of whieh is erect, bearing the fruit, the other spreading, triangular, membrancous and mueh divided. Plant 8 inches apart. 15 cts. each, $\$ 1.25$ per doz.

1. I ygodium palmatum
2. Scolopendrium vulyare
3. Aspidium munitum
4. Aspidium aculeatum var. Braunii
5. Aspidiun thelypteris
6. Aspiclium Felix-mas

20 Botrychium ternatum. © Six to 12 inches high. Fronds evergreen, somewhat resembling the preceding, but smaller and less divided. Found in moist, open fields, often in mowlands and is quite conspicuous in late autumn by the yellowish fruit, and fincly cut grecn or variously tinted leaves which give it a distinctive beauty. Plant 6 inches apart, with the new bud about an inch below the surface. 15 cts . each, $\$ 1.25$ per doz.
21 CAMPTOSORUS rhizophyllus (Walking-leaf). * A little, low-crceping Fern, with evergreen fronds, 4 to 9 inches long, growing in tufts. The ends of these fronds rest on the ground and take root, forming new plants at each "step" thus taken. "This curious habit has given the Fern its popular name. Found growing naturally on shaded, calcarcous rocks. Interesting and quite casy to grow in the rock-garden. If to be grown in the Fern-bed, use a good sprinkling of leaf-mold, raising the bed 2 or 3 inches, and plant on front edge about 6 inches apart. Don't cover the leaves. 15 cts. each, $\$ 1.25$ per doz.
22 CRYPTOGRAMMA acrostichoides (American Rock-Brake). * A small, evergreen Fern, 6 inches high, forming nice little clumps. A native of the Pacific coast, in crevices of rocks; thrives in the rock-garden.

Cystopteris bulbifera (sce page 10) It also takes kindly to a Fern-bed to which leaf-mold has been added. It makes a good border. 20 cts each, $\$ 1.50$ per doz.

Cryptogramma acrostichoides

23 CYSTOPTERIS bulbifera (Bladder Fern) * Fronds 1 to 2 fect long, narrow and slender. Light green in color, and quite graceful. Grows best in a moist, shady place. This makes a good plant for the Fern basket. It ean be planted 8 to 12 inches apart and is quite desirable for planting in front of strongeriFerns, like Aspidium spinulosum, A. marginale, ete. 15 ets. each, $\$ 1.25$ per doz.
24. C. fragilis. ** Smaller; 4 to 8 inches high; fronds two orithree times divided. Forms niee little clumps in shady, well-drained soil. It takes kindly to the roek-garden or ean be planted 6 inches apart in beds with larger sorts. 15 cts. each, $\$ 1.25$ per doz.

25 DICKSONIA punctilobula (Hay-scented, or Gossamer Fern). © * $*$ Grows 1 or 2 feet high. Fronds pale green, very thin, with strong stalks from a slender, ereeping root-stock. A prominent feature in mountain seencry, often seen in great patehes in open places. One of the very bestfor massing either in open sun or partial shade. and will thrive in quite dry or moist soil. if the drainage is good. Plant 8 inehes apart. 15 ets. each. $\$ 1.25$ per doz.
26 LYCOPODIUM clavatum (Club Moss). \& Running extensively, 6 feet long or more, the stems are round and covered with small, light green, pointed leaves, quite a showy evergreen in dry woods; flowers ineonspicuous. 20 ets. each, $\$ 1.50$ per doz.
27 L. complanatum. \& This is the evergreen vine so extensively used in decorating rooms. Short stems, 3 to 6 inches high. have flat-topped, leafy branelhes; brown, running stems often 8 feet long. 20 ets. each, $\$ 1.50$ per doz.
28 L. dendroidium (Ground Pine). * This is the plant used so much for Christmas greens. It grows about 6 inches high, in moist, shady places; is an evergreen, quite showy, and does quite well under cultivation. It ean be grown in the Fern-dish indoors, or in any moist, shady place. 20 ets. each, $\$ 1.50$ per doz.
29 L. lucidulum (Shining Club Moss.) 因 Pretty evergreen, 3 to 8 inehes high. Leaves $\frac{1}{2}$ inch long, growing thickly along the stalk. Moist shady soil. Plant rather thiekly for massing. 3 to 4 inches apart. 20 ets. each, $\$ 1.50$ per doz.
30 LYGODIUM palmatum (Climbing Fern). 因 Grows 1 to 3 feet high. Stalk slender and twining from a slender, running root-stock. A choice and rare kind, needing some support in a moist, shady spot. Plant 1 foot apart and keep the soil well mulehed with leaves for one or two years, adding a little leaf-mold to the soil. A colony of this seen growing in the wild, elimbing the low bushes, is a beautiful sight, and not often seen, as the plant is rather rare or local. 25) ets. each, $\$ 2.00$ per doz.
31 ONOCLEA sensibilis (Sensitive Fern). $\otimes$ A foot high. Wet places, open sun or shade. It ean be planted in quite wet places, too wet for most other sorts, 1 foot apart, or it will thrive in moist soils. 10 ets. each, $\$ 1.00$ per doz.
32 O. Struthiopteris (Ostrich Fern). * Fertile fronds about a foot high; sterile fronds much larger, 2 to 4 feet high, 6 to 10 inches wide; crect. A very handsome species; graceful as a palm. One of the most satisfactory to grow; its long, graceful fronds make a most effective baekground for smaller Ferns.

Lycopodium dendroidium

Onoclea Struthiopteris, continued.
Can be grown as single plants in open sun or shaded nook. Use lots of manure. as it is a great fceder. Plant about 2 feet apart if scveral arc needed. It is one of the very tallest of our Ferns, and should be planted well back. 25 cts. each, $\$ 2.00$ per doz.
33 OPHIOGLOSSUM vulgatum (Adder's -Tonguc Fern). A single leaf from the fibrous roots, bearing at the top a singular spike of fruit or spores. Wet, open places, usually in low, grassy meadows, rather inconspicuous and more desirable for botanical study than general culture. 10 cts each. $\$ 1.00$ per doz.
34 OSMUNDA regalis (Flowcring Fern). *Two or 3 feet high. Pale green. One of the prettiest of the large Ferns. Can be grown in still water, 2 or 3 inches decp, setting the plants so that the crowns shall be just above the water. It can also be grown in moist soils, sun or shade. Plant 2 or 3 fect apart, where scveral are to be grown. Large roots, 30 cts. each, $\$ 2.00$ per doz.; extra heavy, 50 cts . each, $\$ 4.00$ per doz. Last. grade too heavy for the mail.
35 O. Claytoniana. \& Is clothed with loose wool when unfolding its fronds in spring, soon

Osmunda regalis, huge clumps: becoming perfectly smooth. This Fern, 2 to 3 feet high, is found in rather dry, shaded places, and does quite well under cultivation and quite well in boxes. Plant about 2 feet apart if several are needed. 25 cts. each. $\$ 2.00$ per doz.; extra-heavy, 50 cts . each, $\$ 4.00$ per doz.
36 O. Cinnamomea (Cinnamon Fern). 因 Is usually larger than the preceding, often 5 feet high and $\delta$ inches wide. Clothed with rusty wool when young, but the sterile fronds are smooth when full grown. Very beatiful. This will thrive in quite wet soil, in open sun or moist, shady places; usually found in mucky soil. 25 cts. each, $\$ 2.00$ per doz.; extra-hcavy, 50 cts. each, $\$ 4.00$ per doz.
37 PELLEA atropurpurea (Clayton's Cliff Brake). A low evergreen Fcrn, 8 to 12 inches high, usually found on limestone cliffs. We got good results last season with this Fern in clear leaf-mold, raising the bed about 6 inches in a shaded place, using small flat stones between the plants; this kept the soil from drying out. We got plants a foot high in this way. Choice, 25 cts.

38 Pellæa densa (Oregon Cliff Brake). ${ }^{*}$ A little, low Fern, 4 to 6 inches high, found on the rocks on the mountains of the western coast. It does quite well in a raised bed of leaf-mold in a shady place. Plant 4 to 6 inches apart. 20 ets.
39 P. gracilis (Slender Cliff Brake), * A delicate little Fern, 3 to 6 inches high, found on moist, shaded banks. Does quite well in a raised bed of leaf-mold with the other Pellæas. Should be planted rather thickly. 2 to 3 imehes apart. Rather rare. 25 ets. each, $\$ 2.00$ per doz.
PHEGOPTERIS (Beech Fern).
40 P . Dryopteris. Has triangular fronds 3 to 5 inches wide, once or twiee divided. A delicate and pretty Fern. One foot high

Onoclea Struthiopteris (sce page 10)

Lygodium palmatum (see page 10 )
in moist, rich shaded places, of ten near a mountain brook; it is benefited by adding a little leaf-mold to the soil. Quite desirable for growing with other small Ferns, or in front of larger sorts. PlantS inches apart for permanent bed. 15 cts. each, $\$ 1.25$ per doz.

Phegopteris hexagonoptera
41 Phegopteris hexagonoptera. * good Fern for the shady corner, 7 to 12 inches wide, broader than long; quite showy and easily grown in almost any garden soil. One foot high; desirable for growing in front of the taller and larger kinds. Plant 8 inches apart. 15 cts. each, $\$ 1.25$ per doz.
42 P. polypodioides. 因 Fronds smaller and darker green than in the last. Eight inches high, often found on mossy banks just above the water of a mountain brook, and often with Dryopteris, but not so particular as to soil when cultivated. It makes a good Fern for the front border of a Fern bed, and, if planted 6 inches apart, should, in two years, make a solid elump. 15 cts. each, $\$ 1.25$ per doz.

43 POLYPODIUM vulgare (Common Polypody). Whe of the best evergreen species

Phegopteris dryopteris (see page 12) for rockwork. (irows 4 to 10 inches high, forming dense mats. Generally found on half-shaded rocks, often covering them. It is desirable for front edge of Fern bed, and will adapt itself to almost any kind of soil not too wet; plant it about 4 to 6 inches apart for quiek results. Cover the new buds slightly. 15 cts. each, \$1.25 per doz.
44 P. falcatum (Kcllogg's Polypody). (*) Six to 12 inches high, found in Washington and Oregon, growing on trees and in clefts of rocks. Does well here in New England if given a bed of leaf-mold well drained. 15 cts. each, $\$ 1.25$ per doz.
45 SELAGINELLA rupestris. A little, low, moss-like plant, 1 to 3 inches high, growing in little tufts; the color is grayish green. It grows on exposed rocks. 15 cts . each, 81.25 per doz.

Hootwardia angustitolia

46 Selaginella apus. © A pretty little creeper, with fine, scalc-like leaves. Desirable for a moist situation, and makes a fine groundwork for small floweri n'g plants. Will grow in open sun; any wet or moist place will do. 10 cts cach, $\$ 1.00$ per doz.

## 47 SCOLOPENDRIUM vul-

 gare (Hart's 'Tonguc). * A very rare Fern in the United States, with simple fronds, 6 to 12 inches high; very easily cultivated. Fine for rockwork in moist leaf-mold. 25 cts.48 WOODSIA Ilvensis (Rusty Woodsia). © * This little Fiern often chooses for its home the exposed rocks on tops of monntains, forming little tufts and forcing its roots down into the crevices. Twenty ycars ago I saw it in masses on the grounds where Mt. Tom House now stands, in Holyoke, Mass., 1,200 feet above the sea. It will also thrive in moist soils in shade but give it good drainage. It grows about 6 inches high and is at home in front part of Fern-bed; plant about $S$ inches apart. 120 cts . each, $\$ 1.50$ per doz.
49 W. obtusa (Obtuse-leaved Woodsia). * Six to 12 inches high; found on rocky banks. An easy Fern to grow, and one quite desirable for rockwork. This will thrive in almost any shaded place not too wet. It can be planted $S$ inches apart in front of larget Ferns, and is benefited by the addition of a little leaf-mold. 20 cts. cach. $\$ 1.50$ per do\%. WOODWARDIA (Chain Fern). 50 W . angustifolia. * 12 inches high by 3 to 4
 inches wide. Grows in wet bogs, but takes kindly to cultivation in moist garden soil and will thrive even if put in highest rockgardens. 25 cts. each, $\$ 2.00$ per doz.
51 W. Virginica. *Is larger, 2 fcet high by 3 to 5 inclics broad. Wet swamps or bogs. Can be grown in any garden soil. Plant 12 to 14 inches apart if a permanent bed is desired. 15 cts. cach, $\$ 1.25$ per doz.

Planting of Ferns in woods with rhododendrons in the background

## Hardy Ferns

The following collections are made up to help in selecting for special needs, and should be sent by express or freight
If to be planted in beds, the height as given after each kind would indieate where it should go; if in beds where they are to be seen from all sides, the tall kinds in the center; but if in an angle of the house or wall, plant the taller kinds the farthest baek, 8 inches or a foot from the wall, and the smaller kinds in front.

## No. I, \$5.00. For Open Sun Culture

This eollection is desirable for the open border, and all the Ferns, being rather tall, ean be grown as single speeimens or for massing, with or without flowers.
6 Onoclea Struthiopteris, 2 to 4 ft .
24 Dicksonia punctilobula, 1 to 2 ft .
6 Osmunda Claytoniana, 2 to 3 ft .
6 Asplenium Felix-fæmina, 2 to 3 ft .

## No. 2, \$5.00. For Dry, Shady Places

These Ferns will grow in a dry, shady place. Plant them where flowers, as a rule, do not thrive.

12 Aspidium acrostichoides, 1 ft .
12 Aspidium marginale, 1 to 2 ft .

12 Dicksonia punctilobula, 1 to 2 ft .
6 Osmunda Claytoniana, 2 to 3 ft .

## No. 3, \$5.00. For Moist, Sbady Places

This collection is fine and easily handled in moist, shady places; also for large rockery.

6 Adiantum pedatum, 1 ft .
6 Asplenium thelypteroides, 2 to 3 ft .
6 Aspidium cristatum, 1 ft .
6 Aspidium acrostichoides, 1 ft .
6 Aspidium spinulosum, 1 to $1 \frac{1}{2} \mathrm{ft}$.
6 Aspidium marginale, 1 to 2 ft .

6 Asplenium Felix-fæmina, 2 to 3 ft .
6 Phegopteris hexagonoptera, 1 ft .
6 Woodwardia Virginica, 2 ft .

## No. 4, \$5.00. For Wet, Open Ground

These Ferns are very useful for border of a lake or low, wet ground.
12 Aspidium Thelypteris, 1 ft .
12 Osmunda regalis, 2 to 3 ft .
12 Onoclea sensibilis, 1 ft .
12 Woodwardia Virginica, 2 ft .

## No. 5, \$5.00. Low Evergreen Ferns for Rockery in Sbade

This is a beautiful collection of low-growing Ferns and easily managed.

12 Asplenium ebeneum, 6 to 15 in . 12 Polypodium vulgare, 4 to 10 in .
12 Asplenium Trichomanes, 3 to 6 in .
12 Camptosorus rhizophyllus, 4 to 9 in.

6 Woodsia obtusa, 6 to 12 in.

No. 6, \$5.00. Low Evergreen Ferns for Dry, Rocky Ledge

12 Asplenium Trichomanes, 3 to 6 in.
12 Woodsia obtusa, 6 to 12 in .

12 Polypodium vulgare, 4 to 10 in .
12 Woodsia Ilvensis, 6 in.

## ONE-HALF OF ANY ONE OF TIE ABOVE COLLECTIONS FOR $\$ 3$

You will notice that some kinds are named in more than one collection. Such seem to thrive equally well in the localities named.

Woodsia obtusa (see page 14)

## Hardy Perennials

FLOWERS THAT LIVE YEAR AFTER YEAR

Wc will deliver any of these Hardy Herbaceous Perennials, of mailable size, at any postoffice in the United States at prices given. Can usually supply somewhat heavier stock than can easily go by mail, and shall be glad to do so when our stock will warrant it and the party is willing to pay express charges. Where extra-strong stock is desired, we can often make such selections at a reasonable advance in price from catalogue rates. Postage on these plants to Canada is much higher than in this country; parties ordering plants sent there by mail will_please add 3 cents per plant to above catalogue prices.

ACHILLEA filipendula. © ${ }^{\circ}$. One to 2 feet high;

Anthemis Montana (see page 18)
flowers in dense, broad heads all summer. Very choice for cutting. 10 cts . each. $\$ 1.00$ per doz.

ACONITUM autumnale (Autumn Aconitc). © A handsome border plant, 3 to 4 fcet high with long spikes of blue, hood-shaped flowers in late summer or autumn. 25 cts. each.

ACTÆA alba (White Baneberry). 因 In racemes of white flowers, followed by white fruit. Fine for rockwork or the shady corner. 20 cts. each, $\$ 1.50$ per doz.

ALYSSUM argenteum. - Plant about a foot high, with clusters of small yellow flowers in summer. Open border plants. 15 cts. each, $\$ 1.50$ per doz. lcaves finely cut as a fern; flowers small bright yellow in flat heads. Blooms all summer. 20 cts. each.
A. Millefolium roseum (Rose-colored Yarrow). (This is a finc, hardy plant, with rose-colored flowers. Plant in a sunny place. 10 cts . each.
A. The Pearl. Very double, pure white

Aster multiflorus (see page 20)

Alyssum saxatile compactum (Madwort). Showy perennials, with bright yellow flowers in spring. One foot high. Plant in a sunny place. 15 cts . each, $\$ 1.50$ per doz.; seed, 5 cts.
ANCHUSA Italica, var. Dropenose (Italian Arkanct). A thrifty plant, with large, broad leaves at the basc; flowcr-stalks 3 fcet high, bearing purple flowers in heads. Plant among shrubbery or well back in border. 25 cts. each.
ANEMONE nemorosa (Wind-flower). 因 Grows 2 to 4 inches high. Flowers white, tinged with purple; partial shade. 15 cts . cach, $\$ 1.25$ per doz.
A. sylvestris. © A border plant of good form; very much like Japonica, but quite hardy. The flowers are large, waxy white, with yellow stamens, on stems 6 to 10 inches long, forming good clumps; flowers in spring to July and often until frost; plant in a sunny place. 15 cts. each, $\$ 1.25$ per doz.
A. Pennsylvanica. Twelve to 18 inches high, with large, single, pure white flowers. Plant in the moist border in a sumny placc. Quite hardy. 10 cts . each, $\$ 1.00$ per doz.
A. Pulsatilla (Pasquc flower). $)$ A choice, hardy border plant from Europe, with large, purple flowers in spring; it delights in a well-draincd, sunny place, forming good clumps. Flower-stalks 6 inches high. 20 cts. cach.
ANTENNARIA Margaritacea (Pearly Everlasting). \& A plant of our dry fields and open woods, growing about a foot high. with white woolly lcaves; flowers in broad heads, pearly white. Can be kept a long time if cut before maturing and dricd; Quite fragrant. 15 cts. each, $\$ 1.25$ per doz.

ANTHEMIS tinctoria (Golden Marguerite) Quite a showy border plant, with a profusion of rather large, daisy-like yellow flowers and fincly cut leaves; easily grown. 15 cts.
A. Montana. Similar in growth to tinctoria but the flowers are pure whitc. 20 cts . each.
AQUILEGIA (Columbinc). © Quite showy plants, with many varicties of color; some have been grown for years and arc well known in old gardens. They may be uscd to splendid advantage in the border or rockgarden.
A. alpina. $)_{\text {From Switzerland. Flowers bluc, }}$ large and quite showy. May and June. One foot. 15 cts. each, $\$ 1.50$ per doz.; sced, 5 cts.
A. alpina alba. - Pure waxy whitc. A good strong grower. Sclected plants, 20 cts. ; sced, 5 cts.
A. Canadensis. Onc of our prettiest wild flowers; 8 to 20 inches high, with ycllow and red flowers an inch long. Very desirable for rockeries. Many desire this for the national flower. 15 cts. each, $\$ 1.25$ per doz.
A. chrysantha (Golden-spurrcd Columbine). © Flowers large, golden yellow, with long spurs. 15 cts. each, $\$ 1.25$ pcr doz.; seed, 8 cts.
A. Skinneri. © Eighteen inches high, with orange-red flowers. 20 cts. each.
A. vulgaris. © From Europe. Flowers violet. 15 cts. each, $\$ 1.25$ per doz.; secd, 5 cts .
ARABIS albida (White Rock Cress). A low plant no more than 3 or 4 inches high, yet forming nice clumps, with quantities of small, white flowers in early spring; will adapt itself to almost any situation not too wet; quite hardy. 20 cts .; seeds, 5 cts .

Arabis mollis. Similar to above in masses of pure white flowers. The little rosette of small shining oblong leaves is a great improvement on the old sort. It forms good clumps and the soil is carpeted with the small shining leaves. 20 cts .
ARENARIA Groenlandica. A little low alpine with large white flowers; leaves, small and moss-like; it delights in a moist, shady place. 15 cts. each.
A. Montana. Low perennials, forming mats; suitable for roekwork; flowers, rather large, white. 20 cts. caeh.
ARISÆMA triphyllum (Indian, or Wild Turnip). * A peculiar-shaped flower; greenish or often variegated; found in low, moist, rich woodlands. 15 ets. each, \$1.25 per doz.
ARMERIA (Sea Pink). © Low plants, with narrow, grass-like leaves elustered at the base. Makes a good border plant, and is quite easy of culture.
A. Lauchiana. (b) One foot. Numerous narrow leaves at the base; flowerstalks about 1 foot; flowers purple, in little elusters at the top. A good border plant. Clumps, 20 ets.

A. splendens. -() One foot. A good border plant and also does nieely in pots. Clumps, 20 ets.
ASARUM Canadense (Wild Ginger, or Canada Snakeroot). 因 A low perennial, with kidney-shaped leaves, 3 to 5 inches wide, and a single purplish flower elose to the ground. Plant in the shady corner. with your ferns. The roots, dried, are aromatic and pleasant to the taste. 10 ets. each, $\$ 1.00$ per doz.
A. Virginicum (Virginia Snakeroot). © Smaller than the above, with shining, round leaves, green to bronze eolor, mottled with white; rich, shady hillsides, North Carolina. Quite hardy in New England. 20 cts. eaeh, $\$ 1.50$ per doz.
ASCLEPIAS' 'incarnata (Swamp Milkweed). $\otimes$ Two

See page one for explanation of signs before description of plants

Asclepias incarnata continued
to 3 feet high, with slowy, rose- purple flowers. Grows in wet places and along the banks of streams and ponds. 20 cts . cach, $\$ 1.25$ per doz.
A. tuberosa (Butterfly Weed, or Pleurisy Root). One of the most beautiful and casily grown of wild flowers. It grows from 1 to 2 feet high, and has numerous umbels of bright orange flowers. Plant in open sun, in well-drained soil. Hardy. 15 cts. each; sceds, i) cts.
ASTER. The wild Asters are among our prettiest native flowers. They come late in the season, when most other plants are past their bloom, and last until killed by frost. They are casily grown, and deserve more attention from lovers of wild flowers. Those named are among the most showy of the genus.
A. alpinus. About 6 inches high, forming little clumps. Flowers large, violet; quite pretty; open border. 20 cts . each; seeds, 5 cts.
A. cordifolia. \& One to 2 fect, with pale blue flowers in autumn. A common Aster of our New England wood, quite showy and easily grown. 15 cts. each, $\$ 1.25$ per doz.; secds, 5 cts.

Aster ericoides
A. corymbosus. \& One to 2 fect, with white flowers; a prominent Aster of our dry New England woods in late autumn. 15 cts. each, $\$ 1.25$ per doz.; seeds, 5 cts.
A. ericoides. 因 (b) Extra finc in cultivation. These graceful, wand-like, spreading branches are literally covered with fine green or purple leaves, and dotted here and there with large, white flowers. Plant in dry, sandy soil. 20 cts . each, $\$ 1.50$ per doz.; seeds, 5 cts.
A. lævis. ® $_{*}(6)$ A beautiful species, with sky-blue flowers. Grows in dry woodland. 15 cts. each, $\$ 1.25$ per doz.; secds, 5 cts.
A. multifforus. One to 2 feet high; branches covered with small, white flowers. Fine for dry, open places. 10 cts . each, $\$ 1.50$ per doz.; seeds. 5 cts .
A. Novæ-Angliæ. Stout, 3 to 8 feet high. Flowers violet and purple. Moist ground. 20 cts . each, $\$ 1.50$ per doz.; seeds, 5 cts.
A. Novi-Belgii. $\otimes$ Two to 3 fcet high, with large. pale blue flowers. A wet, open bank is best suited for its growth. 20 cts. each; sceds, 5 cts.
A. patens. \& $)$ A foot high, with rough, clasping leaves and large, showy, decp purple flowers in autumn, found on dry banks, both in open sun and shade. 20 !cts. each, $\$ 1.50$ pcr doz.; seeds, 5 cts.
A. undulatus. $\&$ One of the most showy of our wild Asters, growing about 2 feet high, with bright blue flowers; delights in dry, shady place; flowers in late autumn. $155_{1} \mathrm{cts}$. each, $\$ 1.25$ per doz.; seeds, i) cts.

ASTILBE Japonica (False Goat's Beard). © Sometimes called Spiraca Japonica. One to 2 feet. From Japan. Quite hardy here, fnrming large clumps. Flowers small, but in white masses in June. At home in the open borders. Strong clumps, 25 cts. each.
BAPTISIA tinctoria (Wild Indigo). © One to 2 feet. A native plant found in dry soils, sun or shade, especially near the sea. Flowers yellow. Forms good clumps in the open border. 20 cts. each; seeds, 5 cts.
BOLTONIA asteroides. © A tall plant, 4 to 6 feet high, with large, showy white flowers in autumn, resembling asters, and largely used in massing; casily grown in a sunny place. 20 cts. each, $\$ 1.50$ per doz.
CALLIRRHOE involucrata (Crimson Callirrhoē). A very beautiful prostrate. spreading perennial from Texas, with large, showy, crimson flowers all summer. Fine for open borders, or for planting in dry, barren soil. 20 cts. each, $\$ 1.50$ per doz.; seeds. 5 cts.
CAMPANULA. Plant with showy flowers, mostly in blue; easy to grow, and in bloom a long time. For full description, see Bailey's "Cyclopedia of American Horticulture," pages 226 to 233.
C. Carpatica. $)$ Low plants, forming nice clumps, with large, blue flowers in summer. Sunny border. 20 cts. each. seeds. 5 cts.
C. Carpatica alba. © Like the above, only the flowers are pure white. 20 cts. each; seeds, is cts.
C. Medium (Canterbury Bclls). One to 2 feet. Flowers large, open, bell-shaped, in a variety of colors. Biennial. 15 cts. cach, $\$ 1.50$ per doz.; seeds, 5 cts.
C. persicifolia. © A strong, vigorous Campanula. Grows 2 to 3

Campanula carpatica alba fect high with large, open, bell-shaped, blue;flowers; very showy and one of the first to bloom; carly Junc. 20 cts. each, $\$ 1.50$ per doz.; seeds, 5 cts.
C. persicifolia alba. Similar to the above, only the flowers are waxy white. 25 cts. cach, $\$ 2.00$ per doz.; seeds, 5 cts.
C. rotundifolia (Harebell or Blue Bells of Scotland). 囵 This pretty little native will adapt itself to almost any situation. We see it in crevices of rocks many feet above our reach or along the path at the base of the mountains. Give it good drainage in open sun or partial shadc. 25 cts. cach, $\$ 2.00$ per doz.
C. turbinata. © A finc blue dwarf sort. 20 cts . each.
C. Van Houttei. - Plants 18 to 24 inches high, with large leaves and quite large, open bell-shaped blue flowers. It needs open sun for its best development. 25 cts. each.
CARDAMINE pratensis (Cuckoo Flower). - Plants quite slender, yet with pretty heads of small, white or rose-colored flowers. It does quite well in wet places, or even in the border or rock-garden. 10 cts . each, $\$ 1.00$ per doz.
CASSIA Marylandica (American Senna). $\Lambda$ thrifty plant, 2 to 5 feet high, forming large and showy clumps. Flowers yellow, with a dark center. Fine for moist, open places. 20 cts. each, $\$ 1.50$ per doz.

CATNIP (Nepeta Cataria). An aromatie herb, found near dwellings. Cats are fond of it. 10 cts.
CAULOPHYLLUM thalictroides (Blue Cohosh). * A thrifty plant of our New England hillsidles. Flowers greenish, followed by the large blue berries. 20 ets.
CENTAUREA montana (Mountain Bluets). © A useful border plant, sometimes ealled Hardy Cornflower, with showy white, cottony leaves and large, bright blue flowers in early summer; valuable for entting. 25 cts. each.
CERASTIUM Biebersteinii. © 4 to 6 inches high; leaves silvery white; masses of pure white fowers in early summer; used for edging and mixed borders. 15 cts. each.

Campanula persiciolia alba (sce page 21)

Campanula rotundifolia (Blue Bells of Scotland) (sce page 21)

CHELONE glabra (Snake Head). * One to 2 feet; flowers white to rose-color, in late autumn; grows in wet plaecs. 20 cts. each, $\$ 1.50$ per doz.
CHRYSOPSIS (Golden Aster). Eight or 10 inches high, with smooth, dark green, narrow leaves, and large bright yellow flowers in summer. Delights in a dry soil, in open sun. Clumps, 25 ets. each, $\$ 2.00$ per doz.; seeds, 5 ets.
CIMICIFUGA racemosa (Black Snakeroot). 囵 © Tall, 4 to 6 feet, with white flowers in clongated racemes. Desirable for a moist, shady corner. Clumps, 25 ets. each, $\$ 2.00$ per doz.
CLAYTONIA Virginica (Spring Beauty). 为 Has large, rose-colored flowers in early spring. Shady place. 10 cts each, $\$ 1.00$ per doz.
C. Caroliniana. Similar to above but with wider leaves. 10 cts . each, $\$ 1.00$ per doz.

CLINTONIA borealis．因 A littlc，low pcrennial，with two or three dark green，shiny leaves from the ground，the flower－stalks about 6 inches higl，bearing at the tops a few，rather large，greenish yellow lily－like flowers in carly spring；a cool，shady place． 10 cts．each， $\$ 1.00$ per doz．

H. fulva. (Brown Day Lily). © This, although an old garden plant, is a good one, growing about 2 fect high, bearing reddish yellow flowers; forms good clumps on dry or moist banks. 1.5 ets. each, $\$ 1.25$ per doz.

HEPATICA triloba (Round-lobed Hcpatica). . . Onc of the earlicst of our wildwood flowers. Leaves threc-lobed; the flowers are pink and dark purple. Fine for massing in the shady corncr or open woods. 15 cts e each, $\$ 1.25$ per doz, , $\$ 6.00$ per 100 .
HEUCHERA sanguinea (Coral Bell). Leaves evergreen, sealloped and marbled. Flowers borne on long stems, small, but of the most brilliant scarlet. From Siberia. Perfectly hardy. Give it a rich, moist place in the border. Clumps, $2 \overline{5}$ cts. cach, $\$ 2.00$ per doz.
H. Americana, An American species, with beautifully marbled leaves. A good border plant where a nice cdging is desircd. 25 ets. each.
HIBISCUS Moscheutos rosea (Swamp Rosc Mallow). A A tall, thrifty plant, desirable for a moist, sunny place. Flowers large, rose-colored and very showy. 20 cts . each, $\$ 1.50$ per doz.; sceds, 5 ets.
H. Crimson Eye. Flowers large, purc white, with deep crimson eyc. Very choice and new. Perfectly hardy,
Delphinum grandiforum album (see page 23) either in common garden soil or very wet place. 20 cts. each, $\$ 1.50$ per doz.; sccds',
$i$ i) cts. HOUSTONIA cærulea (Bluets). A little low biennial, 2 to 4 inches high, sparingly branched from the base. Flowers small, delieate light bluc, sometimes pale lilac or white, with a yellowish eyc. Grows in tufts in open, moist, or grassy places. May. 10 ets. each, \$1.00 per doz.; \$i. 00 per 100 .
H. purpurea. Two to 6 inches high, with waxy white flowers all summer. At home in the rock-garden. 15 ets. each, $\$ 1.25$ per doz.
HYDRASTIS Canadensis (Orange Root). $\begin{aligned} & * \\ & \text { Four to } \\ & 10 \text { inches high, sending up in early }\end{aligned}$ spring a stem, twoleaved at the top, terminated by grcenish white flowers, followcd by red berries. Moist shades. Rare. 15 ets. caeh, \$1.25 per doz.
HYPOXIS erecta (Star Grass). A little wood plant, with grass-like leaves and rather large yellow flowers. 10 cts. each, $\$ 1.00$ per doz.
IBERIS sempervirens (Candytuft). From Canada. Quantities of pure white flowers. One of the choicest for cutting. Hardy: 1i) cts. each, $\$ 1.25$ per doz.; seeds, 5 cts.

## GERMAN IRIS (I. Germanica) *

German Iris. This beautiful and varied Iris will thrive in almost any situation, yet it delights in a moist soil. Just above the water in a lake, it sets off other plants to advantagc.
Charlotte Patti. Lemon-yellow, with reddish brown veins in the center.
Comte de St. Claire. Tall and statcly. White with well-defined blue border. onc-half an inch wide.
Donna Maria. White, shaded lilac.
Florentine. White, swect-scented.
Herant. Flowers bright bluc.
Lilacina. Outer segments white, bordered and flecked with lilac; inner segments white, cdge of limb flecked lilac, base veined and dotted violet.
Mlle. Almira. Flowers sky-bluc, very large, twice the size of any other variety; very tall, with broad foliage. A grand sort.

Funkia Thomas lloge (see page 26)

Eupatorium ageratoides (see page 26)
Mrs. Newbronner. Deep ycllow
Queen of May. Standards and falls :f1 tender rose, veined yellow.
Reine des Pays. Outer segments palc yellow, with reddish brown center.
Agamemnon. Standards pale lavender, flecked and veined blue. Falls white, flecked and penciled blue on the border, more heavily on lower half.
President Thiers. Standards mauve, penciled brown at base. Falls purple, base striped brown and white. Tall, vigorous grower.
Germanica, Spectabilis. Decp purple; early. Victory. Outer petals bronzc. Falls deep violet, striped white and bordered yellow at base. Tall and profuse bloomer.

20 cts . each, $\$ 1.50$ per doz.

## JAPAN IRIS (I. Kaempferi)

Have your Japan Iris shipped by express when possible, as many of the clumps are too large for the mail.

## DOUBLE VARIETIES

Blue Jay. Finc, large, deep bluc flowers, mottled and veined with white.

Beth Hallock. Very large, delicate lavender, freely suffused with white. Dwarf habit; beautifully wavy petals; a very ehoice and desirable sort.
Eclair. Pure white; very large and fine; one of the handsomest white Irises.
Gold Bound. Tall and showy, with flowers very large; pure snow-white, with a large, gold-banded eenter.
Mahogany. Very large flowers; dcep ma-hogany-red.
Mr. Fell. White, with blue veins and center, and splashes of ycllow.
Orion. Very tall; pure white, each petal having a wide border of lilac-red; makes a brilliant effect.
Romeo. Very large, dcep maroon flowers.
25 cts. each, $\$ 2.00$ per doz.

## SINGLE VARIETIES

Apple Blossom. Light colors, beautifully tinted and flaked.
Helen von Siebold. Reddish amaranth, large white eenter, freely veined.
Red Riding Hood. Bright purplish red, yellow eenter, frecly striped with white.

25 cts . each, $\$ 2.00$ per doz.
IRIS cristata (Crested Iris). © A little low species, no more than 2 or 3 inches high, found wild in the southern states. Flowers light bluc, marked with white. Forms nice clumps. Open border. Hardy. 15 cts e each, $\$ 1.25$ per doz.
I. pumila (Dwarf Iris). Decp purple flowers; very hardy. 10 cts . caeh, $\$ 1.00$ per doz.
I. pumila alba. © A white varicty. 10 ets. each, $\$ 1.00$ per doz.
I. pumila sulphurea. Ycllow. 10 ets. each, \$1.00 per doz.
I. Pseudacorus. $\otimes$ Sce Bog Plants.
I. Sibirica. © A tall species, with small blue flowers; fine. 10 cts. each, $\$ 1.00$ per doz.
I. Sibirica alba. $\widehat{\text { S Small white flowers. }}$ 10 ets. each, $\$ 1.00$ per doz.
I. verna. A little low Iris with blue flowers, yellow center. 20 cts. cach.
I. versicolor. $\otimes$ About 20 inehes high with pretty bluc and white flowers. Grows in wet places and along brooksidcs. 10 cts. eaeh, $\$ 1.00$ per doz.
LIATRIS (Blazing Star). © Very pretty border plants, thriving in light, well-drained soil. They have long, grass-like foliage and showy purple flowers in heads or spikes, sonetimes 3 feet long.

Gaillardia grandiflora (see page 26)

Houstonia crerulea (see page 28)

Liatris pyenostachya (Kansas Gay-Feather). A beautiful species from the western prairics. Spike of flowers often :3 feet long. Desirable for the open border. 10 cts . cach, $\$ 1.00$ per doz: : sceds, 5 cts.
L. scariosa (Button Snakeroot). Two to 4 fect high, with large heads of rose-purple flowers in late summer. Rich snil. 10 ets. each, $\$ 1.00$ per doz.; seeds, 5 ets.

Centiana Anclrewsii (see page 27)

Hibiscus Crimson Eye (see page 2S)

## Lilies

Lilies are among the finest of our garden flowers, and take quite kindly to eultivation. They like a moist, yet well-drained soil; although some kinds will thrive in soils heavy in texture, the greater number do much better in a light soil. Lilies are, as a rule, planted in autumn, and no doubt that is the better time for planting a large number, especially if they be imported bulbs or kept long out of soil. But for strong bulbs, taken direct from the nursery and planted without being allowed to dry, they can be planted in spring with good results-as we have proved many times. The soil for the lily bed should be deep and well worked over with fine, well-deeayed manure. The bulbs should be set about 4 inches deep, but not allowed to come in contact with the rich soil. Place either sand or leaf-mold around each bulb; this will help protect the bulbs, and the roots can casily reach the rich soil bencath.

LILIUM auratum (Golden-raycd Lily of Japan). A A large and beautiful species with a white ground-work, little points of crimson all over the inner face and a narrow band of gold painted along the center of each petal. Very fragrant and hardy. Nice large bulbs, 25 ets. each, $\$ 2.00$ per do $\%$

Lilium Brownii. A grand, large. trumpet-shaped Lily, 5 inches long, creamy white inside, chocolate-purple outside. 50 cts . each.
L. Canadense (Wild Neadow Lily). © Grows 2 to 4 feet high, with one to many yellow or yellowish red flowers. Moist clay or sandy soil. well enriched. 1is cts. each. $\$ 1.25$ per cloz., $\$ 6.00$ per 100.
L., var. flavum. Has yellow flowers. 20 cts. each, $\$ 1.50$ per doz.
L. candidum (Madonna Lily). © Large, pure white, fragrant flowers. This Lily should be planted in early autumn. 15 cts. each, $\$ 1.50$ per doz.
L. Chalcedonicum (Scarlet Martagon). $\Leftrightarrow$ A tall Lily, with small, nodkling, bright red flowers. A good garden sort and should be used more generally. 50 ets . cach.
L. elegans. Flowers red; three or four on top of stalk. 2 cts. cach, $\$ 1.50$ per doz.
L. Henryi. - A new and rare Lily of superior merit. It is of strong, vigorous growth, with flowers resembling Speciosum in shape, but the color is a deep orange-yellow, with green bands. 50 cts.
L. Philadelphicum (Wild OrangeRed Lily). ${ }^{(6)}$ One to 2 feet high, with one to two upright, open, bell-shaped flowers, reddish orange, spotted with purple. Plant

German Iris (see page 29)
 in a well-drained soil. Sun or shade. 15 cts. each, $\$ 1.25$ per doz.; seeds, 5 ets.
L. speciosum album. A fine Jily, 2 feet high, with white flowers. $2 \tilde{5}$ cts. each, $\$ 2.00$ per doz.
L. speciosum rubrum. -) Is similar to the above, but the flowers are red. 25 ets. each, $\$ 2.00$ per doz. (See eut on page 34 .)

Iris pumila (see page 31)
L. superbum (The Superb Orange Lily). A very fine native Lily, from 4 to 8 feet high, with flowers from five to fifty on a stalk. It is a great fceder and requires lots of fine manure in a soil 2 to 4 feet deep. Large bulbs, 20 cts. each, $\$ 1.50$ per doz.
L. tenuifolium (Siberian Coral Lily). - ) Plants 12 to 18 inches high; flowers rich searlet. A beauty. 20 cts . each, $\$ 1.50$ per doz.
L. tigrinum, var. splendens. A large vigorous form of the Tiger Lily. 20 ets. each, $\$ 1.50$ per doz. (See cut on page 35. .)
L. tigrinum fl. pl. A double form of the above. 20 cts . each.

LINUM Austriacum (Austrian Flax). Flowers pale blue, blooming very profuscly through the summer. Strong stock, 25 cts. each, $\$ 2.00$ per (loz.: secrls, $\overline{5}$ cts.

Liatris pyenostachya (see page 32)
L. viscaria splendens (Ragged Robin). A A lowgrowing, pink-flowered plant, quite desirable for edgings. 20 cts. each, $\$ 1.50$ per doz.
LYSIMACHIA nummularia (Creeping Charlic). Crecping leafy herb, with large yellow flowers; quite hardy and desirable for covering shady banks and used for rustic vases and baskets. 10 cts. each, $\$ 1.00$ per doz., $\$ 5.00$ per 100.
LYTHRUM roseum superbum. $\otimes$ © Rose-purple flowers; grows along margins of streams. Quite showy. 20 cts . each, $\$ 1.50$ per doz., $\$ 6.00$ per 100.
MALVA Moschata (Musk Mallow). A charming plant, with many large, rose-colored flowers borne on a spreading bush, 2 feet high; quite hardy and casily grown in a sumny place. 15 cts. each, $\$ 1.50$ per doz.; sceds, 5 ets.
M. Moschata alba. With white flowers. 20 cts.

MERTENSIA Virginica (Virginia Cowslip). 圈 This plant grows from 1 to 2 feet high, bearing a panicle of beautiful purple or sometimes white flowers in carly spring; plant in a moist, shady place. 20 cts. each, $\$ 1.50$ per doz.

LOBELIA cardinalis (Cardinal-flower). © One of the showiest of our wild flowers; 2 to 4 fcet high, with large, deep red blossoms along the upper part of the stalk; will thrive in any garden soil or along the border of a lity pond or brook in water 2 or 3 inches deep. 10 cts. each, $\$ 1.00$ per doz., $\$ 5.00$ per 100 ; seeds, 5 cts.
L. syphilitica (Great Bluc Lobelia). .) Similar in growth to the last, but the flowers are blue, streaked with white. Plant in a moist place. Desirable for border of brook or lake. 10 ets. each, $\$ 1.00$ per doz.; seeds, 5 cts.
LUPINUS perennis (Wild Lupine). $A$ native, growing in dry soils, with large spikes of blue flowers in spring. 20 cts. each, $\$ 1.50$ per doz.; seeds, 5 cts.
LYCHNIS. A class of hardy plants, well deserving a place in the garden. Not tall, but quite showy.
L. alpina. Leaves clustered, forming little tufts; flower-stalks a foot high, bearing pretty pink flowers. Rocks or well-drained border. 10 ets. each, $\$ 1.00$ per doz.; seeds, 5 cts.
L. Chalcedonica. Flowers searlet; plant in rich soil. June. Two fect. 20 cts. each, $\$ 1.50$ per doz.; seeds, 5 cts.
L. Flos-cuculi (Cuckoo-flower). \& A slender perennial, 1 to 2 feet high with rather small red or pink double flowers in clusters; a good bloomer, mostly through the season. 20 cts. each.

Lilium speciosum rubrum (See page 33)

MENTHA piperita (Pcppermint). © () An aromatic plant found in moist places and springy banks; it is grown in considerable quantity for the oil, which is sold in the market as "Peppermint." Grows in any moist garden soil. 10 ets. each, $\$ 1.00$ per doz., $\$ 4.00$ per 100.
M. viridis (Spearmint). © A native of Europe. This is often met with in old gardens, and can be grown in almost any soil. 10 ets. each, $\$ 1.00$ per doz., St.00 per 100.
MIMULUS ringens (Monkey-flower). © About a foot high; grows in wet places and bears violet-purple flowers. 15 cts . each.
MITCHELLA repens (Partridge Berry). * A little trailing evergreen. It forms fine mats under cvergreens, and when once established, is sure to please. It does exceedingly well in winter, grown in a bell-glass. Clumps, 25 cts. each, $\$ 2.00$ per doz.
MITELLA diphylla (Bishop's Cap). * Grows 1 to 2 feet high, producing in early spring racemes 6 to 8 inches long of delicate white flowers. Pretty for rockerics. 15 cts . each, $\$ 1.25$ per doz.
MONARDA didyma (Oswego ${ }^{-1}$ Tea). . Two to 3 fect high with bright red flowers borne in profusion. Forms very fine clumps. Plant in moist, open border. 15 cts. each, $\$ 1.25$ per doz.
MYOSOTIS palustris (Forget-me-not). $\otimes$ Lovely light blue flowers,

Lilium speciosum album (See page 33)

Jilium Henryi (see page 33 )
with yellow center. 10 ets. each, $\$ 1.00$ per doz.
NEPETA Glechoma (Ground Ivy or Gill). A little low plant with light blue flowers in carly spring creeping extensivcly, desirable for covering moist banks. 10 cts . each. $\$ 1.00$ per doz.
©NOTHERA (Evening Primrose).
E. fruticosa major. A dwarf form about a foot high, with large yellow flowers; a great bloomer. Plant in a sunny place. 20 cts . each, $\$ 1.50$ per doz.; seeds, 5 cts.
E. speciosa. Grows 1 foot high. Flowers large, white and beautiful. Dry soil. 20 cts. each, seeds, 5 cts.
©. Missouriensis. () A low plant, with very large yellow flowers. Quite showy and intercsting; blooms profusely and is always admired. 25 cts. each; seeds, 5 cts.

See page one for explanation of signs before description of plants.

Enothera rosea. A good-sized bush, well covered in summer with small, rosecolored flowers. 10 cts . each, $\$ 1.00$ per doz.
©. YOUNGII. A strong vigorous plant 2 to 3 feet high, well branched and bearing a profusion of large bright yellow flowers. At this time, June 24th, SS blossoms were counted on a single plant; open border. 20 cts. each.
OPUNTIA vulgaris (Prickly Pear). Quite hardy. Flowers dull yellow. 25 ets. each.
OXALIS acetosella (Wood Sorrel). * A beautiful Oxalis found growing in moss in shady, moist places. Flowers large, white, with purple veins. 10 cts each, $\$ 1.00$ per doz.
O. violacea (Violet Wood Oxalis). ** Two to 6 inches high, from a sealy bulb. Flowers pink; fine dark foliage. 15 cts.

Lilium tigrinum f. pl. (see page 33)

PACHYSANDRA terminalis. $*$ A plant with glossy green leaves and low, creeping habit; forms dense mats; makes a desirable covering for the soil in dry, open places, or partial shade; the small, white flowers, in carly spring, are borne on short spikes. 20 cts. each.
PAPAVER nudicaule (Iceland Poppy). A choice, hardy garden plant, with leaves lobed, forming little tufts at the ground; the showy flowers are borne on threadlike naked stems about a foot high. It delights in a sumny spot in the border or rock-garden. 15 cts. each; seed, 5 cts.
P. orientale (Oriental Poppy). Hardy border plants, with large, showy scarlet flowers with a dark center. The flowers are often 6 inches across. Plant in a well-drained soil in open sun. 25 ets.; sceds, $\overline{5}$ cts.
PARDANTHUS Chinensis (Blackberry Lily). - A hardy perennial, well known in old gardens; a foot high or more, bearing rather large, orange, spotted red flowers, followed by the showy black sceds, resembling blackberries. 20 cts. each, $\$ 1.50$ per doz.
PARNASSIA Caroliniana (Grass of Parnassus). $\otimes \Leftrightarrow$ Six to 15 inches high. Flowers white, marked with greenish veins; showy. 15 ets. each, $\$ 1.50$ per doz.
PENTSTEMON barbatus Torreyi. © A showy perennial, with scarlet flowers; choice. 25 cts. each.
P. digitalis. Thall perennial, 2 feet or more high, with rather showy white or tinted flowers in profusion. It is at home in a well-drained soil in some sumny spot. 20 ets. each.

## Herbaceous Peonies

Thrifty peremials, with very large, showy flowers in a great variety of colors. No class of plants is better adapted for general cultivation than this one, as they are not particular as to soil or position. They do exceedingly well in partial shade, will give grand results banked in front of shrubbery, along a driveway, mixed with other tall-growing plants, like phloxes, etc., or planted in masses by themselves. They are great feeders, so the bed or border for Peonies should be made deep and rich by spading in a quantity of well-decayed cow-manure 2 feet deep or more, mixing it thoroughly with the soil. The crowns should be planted not more than 2 inches beneath the surface of the soil. Each fall put a good covering of manure over the beds, which will be all the covering or mulching needed through the winter. For the greater perfection of bloom, they require an abundance of moisture, and some growers recommend liquid manure applied to the soil just before and during the blooming season which is the middle of May to July. When properly cared for, these Peonies will thrive twenty years or more.

Lilium tigrinum splendens (see page 33)
Floral Treasure. A beautiful, fragrant, elear bright pink, of elegant form. 40 ets.
Fuji-some-gime. Pale rose, central filamental petals ycllow. 50 cts .
Hinodesse-jirhi. Crimson, central petals tipped yellow. Very large and showy. 50 ets .

## Phlox

PHLOX decussata (Hybrid Phlox). © A class of hardy perennials that, within a few years, has come into great prominence. They grow from 1 to 3 feet high, have strong stems, and bear masses of showy, rainbow-tinted flowers. They are quite hardy. A good allowance of manure should be worked into the soil every year.
Amor. Carmine-rose; large flowers, with starry white centers. 25 ets.
Aurora Boreale. Salmon-rose, crimson cye, tall; a desirable sort. 25 ets.
Ball of Fire. Brilliant erimson, the brightest in color of all Phloxes in eultivation, "and one of the most charming sorts. 25 cts.

## SINGIE PEONIES ©

Fuji-some-gime. Palc rose petals, with yellow stamens. 50 ets.
Kasane Jirhi. Large pink petals, with yellow stamens. 50 cts .
Ophir. Dark red. 50 cts .
Saturn. Rosy pink. 35 cts.

## DOUBLE PEONIES ©

Abraham Lincoln. Pctals clean pink, infolding like roses; rose shaped petals outside; flowers 5 inches in diameter. 50 cts.
Baron Rothschild. Large and double; chrysanthemum center of creamy white, surrounded by large pink petals. 50 cts.
Double Pink. 50 cts .
Double Dark Red. 45 cts.
Festiva alba. Finc pure white. 50 cts.

Linum Austriacum (see page 33)

Coquelicot. Fiery scarlet; unequaled color; dwarf. 25 cts.
Concourse. Rosy carmine; firc-colored center. 25 cts.
Eclaireur. Deep carmine, rosy salmon center; dwarf. 25 cts.
Independence. Large and extra fine, pure white flower. 25 cts .
Joan of Arc. Large panicles of pure white; dwarf. 2.5 cts.
Kramer, J. A. Soft rosy pink, rayed with white. 25 cts.
La Neige. Pure white, fine large flowers; medium height. 25 cts .
Le Pole Nord. White, with very distinct crimson cye. Tall, and one of the choice late bloomers, forming large clumps. 25 cts.
Lothair. Brilliant salmon, cardinal cye. 25 cts .
Miss Lingard. An early sort, with pure white flowers and distinct lavender eye; tall, cylindrical spikes. A constant bloomer. 25 cts .

Lobelia cardinalis (See page 34)

Queen. Pure white; compact habit and large, full truss. 25 cts.
Star of Lyons. White, rosy lilac cye; dwarf. 25 cts.
Temple, J. T. Carmine-rose; large bloom; dwarf. 25 cts.
Fine Mixed Sorts. 15 cts.; large clumps, by express, 25 cts. each, $\$ 2.00$ per doz.

## OTHER VARIETIES OF PHLOX

PHLOX amœna (Lovely Phlox). © One of the most charming little dwarf plants imaginable, growing only about 6 inches high. and forming a mat of evergrcen foliage which is entirely covered with compact heads of bright pink flowers from April until June. A lovely spring-blooming plant. 20 cts . each, $\$ 1.50$ per doz.
P. divaricata. $\widehat{\otimes}$ About 15 inches high. Flowers pale lilac or bluish. Grows in rocky woods. 10 cts . each, $\$ 1.10$ per doz.

Lobelia syphilitica (Sec page 34)

Phlox maculata (Wild Sweet William). © Onc to 3 feet high, white or purple flowers 10 cts. each, $\$ 1.00$ per doz.
P. pilosa. © One foot. A plant of much merit and deserving a prominent place in the open border. Flowers purple; quite showy. 20 cts. cach.
P. subulata (Ground, or Moss Pink). © A creeping or tufted species, growing in broad mats on dry, rocky hills or sand-banks. In the summer it does quite well in the border and ean be used for edging or among larger plants, where it soon covers the ground. 15 cts. each, $\$ 1.25$ per doz.
P. subulata, var. alba. © A variety of the above, with pure white flowers. It is very desirablc for covering a rocky or sandy place. 15 cts. each, $\$ 1.25$ per doz.
P. reptans. $\Leftrightarrow$ A low plant, with large, rose-purple flowers. 15 cts. each, $\$ 1.10$ per doz.

PLATYCODON Mariesi. © Beautiful variety, with dark green foliage and large deep violet-blue flowers, 2 to 3 inches in diameter. Summer. Very choice. 1 foot. Clumps, 25 cts.; seed, 5 cts.
P. Mariesi alba. © With white flowers. 25 cts. (Sec cut on page 42.)

See page one for explanation of signs before description of plants.

PODOPHYLLUM peltatum（May Apple，or Mandrake）．困 A peculiar herb，with creep－ ing root－stocks and fibrous roots．Grows a foot or more high，with large，round，seven－ to－ninc lobed leaves，peltate in the middle． Flowers nodding，white， 1 to 2 inches broad．May． 15 ets．each，$\$ 1.25$ per doz．
POLEMONIUM cæruleum（Jacob＇s Laddcr）． （）A good border plant，with numerous bluc flowers．May and June．It can also be used in rather wet soils． 20 cts．each．
P．，var．album．© A variety of the above，with white flowers． 20 ets．cach．
P．reptans（Greek Valcrian）．© One foot． Finely cut foliage and clear bluc flowers in clusters．Spring． 15 cts ．each．
POLYGALA paucifolia（Fringed Polygale），因 A low－growing and interesting plant．May and Junc．Leaves of a delicate purple tint， and large，handsome，rose－purple flowers， beautifully fringed．Clumps， 25 cts．each， $\$ 2.00$ per doz．
P．Senega（Seneea Snakeroot）．＊This plant has two or more stems from a thick root－ stock．Grows 6 to 11 inches high，bearing a raceme or spike of small，white flowers． 15 ets．each，$\$ 1.25$ per doz．
POLYGONATUM biflorum（Solomon＇s Scal）．因 A foot high；often seen in rich，shady places，and bearing in June several or many rather small，greenish flowers along the upper half of the stalk，followed by the black or blue berries which are quite eonspicu－ ous in autumn．Plant in moist shade；perfectly at home in the rock－garden．15 ets． cach，$\$ 1.2$ ．）per（loz．

Mitella diphylla（see page 35 ）
See page one for explanation of signs before description of plants．

Polygonatum giganteum. 因 Larger and stronger than the above. Often 4 feet high. Give it a strong, rich soil. 25 ets. each.
PRIMULA (Primrose). Charming little perennials, partieularly adapted for rockeries or the welldrained border, either singly in masses or when planted with other early and low-growing plants, like pansies, forget-me-nots, dwarf phloses, or iris. The colors are rieh and varied, and have a delightful fragrance. They make a beautiful addition to the hardy garden.
P. auricula (Auricula). © Foliage smooth, flowers quite large, in many variations of color, red, purple, yellow, sometimes with white or ycllow eyes, and often with a band of gold or larker shade on the edge. Some protection should be given it in winter. 20 ets. each, S1.50 per doz.
P. Cacnemiriana. © Leaves in tufts, powdered yellow; flowers rich purple, with yellow eenter, on stout stems. 20 cts . (See eut on page 42.)

Mertensia Virginicat (see page ist)

Platycodon Mariesi (see page 39)
P. Japonica. Twelve to 18 inches high. A Primrose of vigorous growth, having several whorls of quite showy purple to white flowers along the upper part of the stalk. Early summer to July. Strong plants. 25 cts. cach.
P. Polyantha. © This is the common form of the hardy garden primrose, bearing its many flowered umbells on stems well above the elusters of leaves. Mixed sorts, mostly in garnet and yellow, good elumps. 20 ets. each, $\$ 1.75$ per doz.
P. vulgaris (English Primrose). © Flowers pale yellow in early spring borne on single stems. A charming, hardy plant found wild in Britain. 25 cts. citch, $\$ 2.00$ per doz.

See page one for explanation of signs before description of plants.

Platycodon Mariesi alba (see page 39)

Primula Cachemiriana (see page 41)
PYRETHRUM corymbosum. © A beautiful, hardy perennial, 1 to 3 feet high, with an abundance of large, white, daisy-like flowers, with ycllow centers, in summer. Moist, sumy places. 20 ets. cach.
P. hybridum. © Popular flowers, deserving a place in every garden. The plants form broad clumps, with handsome, fern-like foliage. Flowers daisy-like in mode of growth; very deep pink to almost white. Clumps, 20 cts.; seeds, 5 ets.
P. uliginosum (Great Ox-cyc, or Giant Daisy). © Two to 5 fect. Russia. One of the choicest. Forms a stout, upright bush, with light green foliage. In autumn it bears a profusion of the choicest, pure white flowers, with bright yellow centers. Two to 3 inches across. 20 ets. each.
RANUNCULUS (Double Buttereup). © Dorble yellow; an old garden plant. 15 cts. each, $\$ 1.25$ per doz.
RHEXIA Virginica (Meadow Beauty). A low perennial, less than a foot high, with numerous bright purple flowers and yellow stamens through the summer. Plant in moist, sumy places, 3 inehes apart. It forms large beds. 15 ets. each, $\$ 1.25$ per doz.

Phtox decussata (see nace 37)

Primula Polyantha (see page 41)
RUDBECKIA lanceolata (Golden Glow). A very showy plant. with very large, double yellow flowers. Forms fine elumps; blooms late in autumn. 25 ets.
SABBATIA chloroides. See Bog Plants.
SANGUINARIA Canadensis (Bloodroot). 囵 A low perennial, about 6 inehes high, with pure white flowers an ineh in diameter, in carly spring. The large, leathery leaves appear later. Plant in rich, shady places or rock-garden. 15 ets. eaeh, $\$ 1.25$ per doz.
SAXIFRAGA Aizoon. \& A little alpine plant, with rosettes of leaves marked with white dots. Flowers creamy white on short stems. Plant in a dry part of the roek-garden. 20 cts.
S. cordifolia. From Siberia. Flowers rose-eolored, in early spring; leaves rather large, quite near the ground; plant in a moist plaee in open sun. 25 ets. eael.
S. palmata. $\Leftrightarrow$ A mossy Saxifraga. with large white flowers in June; the stems are rather low, not over 6 inches high, but is quite showy when planted among roeks in a sheltered position. 25 cts. caeh.
S. Virginiensis. $\boldsymbol{*}^{*}$ A low perennial, 4 to 9 inches high, with a eluster of pretty white flowers appearing in early spring. For rockeries. 10 ets. eaeh, $\$ 1.00$ per cloz.

Primula vulgaris (see page 41)

## SEDUM (Stonecrop)

A class of plants partieularly adapted for earpeting very dry, sandy or roeky plaees in open sun. The taller varieties are quite useful in the border, being quite showy.

## LOW VARIETIES

SEDUM acre. - A little, low, tufted perennial spreading on the ground. Flowers yellow; very pretty for rockwork or growing in front of the hardy border. 10 ets. eaeh, $\$ 1.00$ per cloz.
S. album. From northern Asia. A low plant, 4 to 6 inches high, with linear leaves $1 / 2$ inch long; flowers white, with red eenters; useful for covering dry roeks and banks in open sun. 10 ets. eaeh, $\$ 1.00$ per doz.

Sanguinaria Canadensis (see page 43)

Sedum Kamtschaticum. © Four to 6 inches high, leaves rather large, running extensively, quiekly covering the soil; flowers ycllow, in late summer. 10 cts. cach, $\$ 1.00$ per do\%.
S. reflexum. Six to 10 inchas high, with thick, linear green leaves and ycllow flowers. A neat grower for dry, exposed rocks or cdging the border. 10 cts. cach, $\$ 1.00$ per doz.; sceds, $\bar{j}$ cts.
S. sexangular. © Similar to S. acre, but the leaves and whole plant are smaller. Uscd for carpeting and covcring dry, bare places. 10 cts. cach, $\$ 1.00$ pcr doz.
S. Sieboldii. A pretty specics 6 to 10 inches high; leaves roundish, in threes about the stalk, having a rosy tint in autumn; flowers arc also rosy colored. It docs quite well among rocks, and makes an execedingly pretty pot plant or in vases where the branches may fall over the edge. 20 cts .
S. stoloniferum. - (Purple Stonecrop). Leaves rather large, trailing; the pink or white flowers are quitc showy; with red anthers in July and August. Dry, open places. 10 cts. each, $\$ 1.00$ per doz.
S. stoloniferum coccineum. A bcautiful crimson-flowered form of the above. 10 cts. each, $\$ 1.00$ per doz.
S. ternatum. () A low plant, with the leaves clustered at the top; flowers white. Rocks or open border. 10 cts e each, $\$ 1.00$ per doz.

## TALL VARIETIES

Thesc taller-growing Scdums will thrive in dry soils like the dwarf kinds and can bc uscd as single specimens on old walls where it can get a foothold, or it does quite well in the open border with other flowers.

Ranunculus (Double Buttercups) (see paye 42)

Sedum Japonicum macrophyllum. © A strong grower, about a foot high, with large, flat heads of waxy white flowers and pink centers. 20 cts.
S. Maximowiczii. () A foot high, with dark grecn, notched leaves, 2 inches long, the bright yellow flowers in flat heads at the top; forms good clumps. It likes a sunny spot where the soil is dry. 20 cts. cach.
S. spectabile. A foot high, or more. It is the most beautiful of all the Sedums; has large, glaucous leaves and forms finc large clumps; the rosy purple flowers are bornc in large, flat, open heads, commencing to bloom in August, and remaining in bloom for two months or morc. This plant will stand extreme cold, heat, or wet, and will do quite well even in a shadcd spot. 25 cts .
S. telephoides. A foot high with thick scalloped leaves, highly colored in autumn. Flowers pink in heads. 20 cts . cach.

Saxifraga dizoon (see page 43)

SEMPERVIVUM (House leck). A class of plants with thick leaves, often tinted with pink or purple. Used for rockwork or edging in dry, open places. 15 cts . each, $\$ 1.50$ per doz.

Saxifraga V'irginicnsis (sep patge 43 )

SHASTA DAISY. - A new Daisy, with large, white flowers and yellow center; fincly cut foliage. 15 cts. each; sceds, $\overline{5}$ cts.
SHORTIA galacifolia. © A rare and beautiful species, but recently introduced from the mountains of North Carolina. The leaves arc evergreen, the petals, five in number, are pure white, and scalloped or notched on the edges; flower about an inch across. Plant in a rich, shady place. Flowers in carly summer. Hardy. Clumps 2.) cts. each, $\$ 2.50$ per doz.

See page one for explanation of signs before description of plants.

Sedun stoloniferum（see page 44）

SIDELCIA malvæflora atropur－ purea．© Two to 3 fect high，with large，open，pur－ ple flowers along the upper part of the stalk．Quite showy in the open border． 1.5 cts ．each，$\$ 1.50$ per doz．

SILENE alpestris（Alpine Catch－ fly）．人）$\Lambda$ pretty little alpine，growing about 6 inches high，with quite large， white flowers；fine for rock－ work． 20 ets．each，$\$ 1.50$ per doz．；sceds 5 ets．
S．maritima（Seaside Catch－ fly）．© A little trailing plant，with numerous white flowers． 15 ets．each．
S．Pennsylvanicum（Wild Pink）．（）Low， 5 to 8 inches high．Flowers clus－ tered，short－stalked，pink． June．Light，well－drained soil in open sun． 10 ets． each，$\$ 1.00$ per doz．；seeds， 5 cts．
S．saxifraga．－An alpine，mossy species of low habit and quantities of small，white flowers． 15 ets．each．
S．Shafta（Autumn Catchfly）． Six to 8 inches high；bush roundish in outline，covered Plant in the sunny border． from June to October with showy，rose－purple flowers． 10 cts．each；seeds， 5 ets．
SMILACINA bifolia（Mainthemum convallaria）．因 Three or 4 inches high，with small， white flowers in spring；fragrant． 10 cts．each．
S．racemosa（False Solomon＇s Seal）．因 One to 2 feet．Flowers white，in ter－ minal racemes．Found throughout New England in moist shades，usually on hillsides．June and July． 15 ets． each， 81.50 per doz．；seeds， 5 ets．
SOLIDAGO（Goldenrod）．© This is an attractive genus of plants，with a large number of variable species，some of which are very beautiful．They come into flower a little before the asters and，with them，add much to the bloom in autumn．In mixed sorts， 10 ets．each，$\$ 1.00$ per doz．， $\$ 5.00$ per 100.
S．cæsia．¥ A tall，yet slender Goldenrod， found in dry，shady places，with smooth，lanceolate leaves．Flowers in small clusters along the upper part of the stalk，bright yellow and quite showy in autumn． 15 cts．each，$\$ 1.50$ per doz．；seeds， 5 cts．

See page one for explanation of signs before description of plants．

Sedum spectabile（see page 44）

Solidago Canadensis. A tall species, in open, sandy places; flowers small, but very numerous, in rather flat heads. One of the very finest and most prominent of all our Goldenrods. 15 cts. each, $\$ 1.50$ per doz.; seeds, 5 cts.
S. nemoralis. A low plant, in dry, open places, with very bright, yellow flowers. August. 15 cts. each, $\$ 1.50$ per doz.; seeds, 5 cts.
S. odora (Sweet Goldenrod). \& © This specics grows about 2 fect high. Leaves bright green having a sweet, aromatic taste and an odor like anise. Flowers of a darker yellow than in most species. Dry, shady places. 20 cts . each, $\$ 1.50$ per doz.; seeds, 5 cts.
S. ? A strong growing plant 2 feet high with masses of bright yellow flowers in autumn. 25 cts. each.
SPIREA lobata (Queen of the Prairics). (b) The flowers are quite handsome, of a deep peachcolor, and produced in abundance in clusters at the ends of the'branches. Very handsome and satisfactory to.grow. Good clumps, 25 .cts. each.
S. filipendula." A very beautiful plant, with finely cut leaves and large trusses of purc white flowers; 6 to 12 inches high. 25 cts. cach.
STACHYS lanata (Wood Woundwort). © A plant 1 to $1 \frac{1}{2}$ feet high, with white, showy, woolly leaves and small, purple flowers. Does well in the open border. 20 cts. each, $\$ 1.50$ per doz.
STENANTHIUM robustum (Mountain Feather Fleece).(-) A plant often 5 feet high, with masses of pure white flowers in long panicles in August and September, turning to pink and purple. Of easy cultivation in the open border. 25 cts. each.
STOKESIA cyanea (Stokes' Aster). © Twelve to 18 inches high. Flowers

Smlacina racemosa (see page 46) large, blue and quitc showy. Blooms from August till late frost. Plant in a well-drained soil. 20 cts. cach, $\$ 1.50$ per doz.; seeds, 5 cts.
STREPTOPUS roseus (Twisted Stalk). 因 Six to 20 inches high. Flowers small, rosepurple. Grows in cool, damp woods. 15 cts. each, $\$ 1.25$ per doz.
STYLOPHORUM ${ }^{\text {diphyllum (Celandine Poppy). }}$. A hardy perennial, forming good clumps; has dark green leaves, and large, showy yellow flowers in summer. Planted in the open border or among shrubs is very attractive. One to 2 feet high. Clumps, 25 cts. cach.
THALICTRUM anemonoides (Rue Anemone). 因 This plant grows about 9 inches high, from a cluster of thickened, tuberous roots. One of the carliest of our wood flowers. Often seen with ancmones. Flowers white. At home in the rock-garden or a welldrained, shady corner. Plant 4 to 6 inches apart. 10 cts. each, $\$ 1.00$ per doz.

Thalictrum dioicum．＊One to 2 feet high．Found in shaded，rich hillsides in early spring． Flowers purplish．Plant in a shaded spot where the drainage is good． 15 ets．each， \＄1．25．per cloz．
T．Cornuti（＇Tall Mearlow Ruc）．© A stronger plant than Dioicum．Often 4 to 5 feet high． This plant delights in a wet，open place，often along brooks．Flowers white．July to Scptember．It does very well in moist garden soil．15 cts．each，$\$ 1.25$ per doz．
TIARELLA cordifolia（False Miterwort）．＊About 10 inches high bearing a short raceme of pretty white flowers．Rich．moist，shadly places．Nay or Junc．1\％cts．eaeh，$\$ 1.25$ per cloz．

THERMOPSIS Caroliniana．A

Shasta I）atisy（see page 45）
tall plant， 2 to 3 feet high，with bright yellow，pea－shaped blos－ soms along the upper part of the stalk．Rich，sumny places in Junc． 20 ets．；sceds， 5 ets．
THYMUS citrioidrus variegatus（var－ iegated thyme）．© A low creep－ ing evergreen with small green leaves striped with ycllow，quite fragrant，used for edging or rock－ work． 15 cts each，$\$ 1.25$ per doz．
TRADESCANTIA Virginica（Spider－ wort）．© An old garden plant， well known for its long grass－like leaves and blue or violet flowers all summer．Plant in a moist， rich place，either in shade or sum． 15 cts．each，$\$ 1.25$ per doz．
TRILLIUM（Threc－leaved Night－ shade）．A class of low peren－ nials，having a stout and simple stem from their tuber－like root， naked，and bearing at the top three ample leaves in a whorl and a terminal flower．They belong to the lily family，bloom carly in spring，and are easily grown．They like a moist，shady situation．
T．cernuum．因 Is about a foot high，with nodding white flowers， tinted with purple． 10 ets．each， $\$ 1.00$ per doz．
T．erectum．＊Has broader，rhom－ boid leaves，with a dark purple flower． 10 ets．each，$\$ 1.00$ per doz．
T．erectum album．図 A varicty with white or greenish white flowers． 15 cts．each，$\$ 1.25$ per doz．
T．erythrocarpum．White flowers painted with purple at the base；delights in cold damp leaf－mold． 15 cts．each．
T．grandiflorum．＊＊Probably the prettiest of the genus，and most generally cultivated． It grows $S$ to 15 inches high，bearing a large，white flower，often 2 to $2 \frac{1}{2}$ inches in length and 2 inches wide，turning to lilac－color with age． 10 cts e each，$\$ 1.00$ per doz．
T．nivale．因 A low kind，with pure white flowers．Four to 6 inches high． 15 cts ．each， $\$ 1.25$ per doz．
T．recurvatum．囵 Leaves green，with white patehes，flowers brown－purple．A most beautiful and casily grown Trillium． 15 cts．each，$\$ 1.25$ per doz．，$\$ 6.00$ per 100.
T．sessile．${ }^{*}$ Four to 12 inches high．Flowers dark－purple． 20 ets．cach，$\$ 1.50$ per doz．
T．sessile，var．Californicum．From the Pacific coast．Large roots． 25 ets．each， \＄2．00 per doz．
T．stylosum．A sotithern species with white or pink flowers，in early spring． 20 ets．each．

TUNICA saxifraga. About a foot high, spreading leaves, numerous; flowers small, but literally covering the plant; rosy white, pink or purple in color. Open border or rock-garden. 10 ets. each, $\$ 1.00$ per doz.; seeds, 5 ets.
UVULARIA grandiflora (Large Bcllwort).* About 15 inches ligh, forking above, bearing numerous membraneous leaves and yellowish drooping flowers. Frequently has more than one stalk from the same root. Blooms in early spring. 10 cts. each, $\$ 1.00$ per doz.
U. perfoliata. * Smaller than the last, with leaves more elasping on the stalk. 10 ets. each, $\$ 1.00$ per doz.
U. sessifolia. ** Similar to the preceding, only the leaves are sessile instead of elasping. All these Uvularias are casily cultivated and quite pretty.

Smilacina bifolia (see patge 4G)
10 ets. eatch, \$1.00 per doz.

A field of Stokesia cyanea (see page 47)

VALERIANA officinalis (Common Valerian), or Garden Heliotrope. © Two to 4 feet high. A plant of old gardens, well known for the spiey fragranec of its small, numerous flowers in spring, which are white, pink or lavender eolored and very fragrant. It delights in the open border in a rich soil, where it soon forms fine elumps. 20 cts . each.
VERONICA alpina (Hoary Speedwell). A low alpine plant of creeping habit; flowers rather small, blue or violet. 10 ets. eaeh, $\$ 1.00$ per doz.
V. gentianoides (Gentian-leaved Speedwcll). One to 2 fect. Leaves elustered at the base, earpeting the soil; pale blue flowers in a short raceme. It does quite well as a border plant or in shady places in rather moist soil. 15 ets. each, $\$ 1.25$ per doz.
V. incana (Hoary Speedwell). ©) About a foot high with numerous, small, bright blue flowers in a raceme; quite showy and forms good clumps in a sunny place. The leaves are woolly, white and attractive. 20 cts . each, $\$ 1.50$ per doz.
V. longifolia. A strong-growing specics 2 fect high, with numerous lilae-col-

Spiræa filipendula (see page 47) ored flowers in a short racenc. July to September. Flowers freely in any good soil. 20 ets. eaeh, $\$ 1.50$ per doz.
V. longifolia subsessilis. © A strong speeies, growing 2 fect or more, of good habit and the small, lustrous blue flowers from August to October make it one of the very choicest of our garden plants. It delights in a rich, moist place in the open border. 25 cts. cach, $\$ 2.00$ per doz.
V. spicata. © Rather slender, 2 feet high, bearing dense spikes of bright blue flowers. June to August. 15 ets. caeh, $\$ 1.25$ per doz.
V. Virginica (Great Virginian Speedwell). . A plant of strong, statcly growth. In a moist, rich soil, which is best suited to its growth, it often attains a height of 6 fect or more. The leaves are borne in whorls along the stalk, flowers in terminal racemes-white or pale blue. The plant, being tall and rather coarsc-leaved, should be set back in bed. 25 cts. cach, $\$ 2.00$ per doz.; sceds, 5 cts.
VERNONIA Noveboracensis (Ironweed). $\otimes$ Three to 5 feet. Vigorous-growing perennials, with very showy purple flowers in small heads in autumn. Very effective as single specimens or grown in elumps near water or very moist ground. 25 ets. each.
VINCA minor (Common Periwinkle). 因 $\downarrow$ A most beautiful evergreen trailing plant with large blue flowers. Also known by name of Blue Myrtle. This plant is quite hardy and very desirable to plant in dry shade where it will cover barren places. 15 ets. eaeh, $\$ 1.25$ per doz.; $\$ 6.00$ per 100. V. minor alba. * A fine variety, with pure white flowers borne in profusion. 20 ets. eaeh, $\$ 1.75$ per doz.
V. minor variegata. A variety with blue flowers and variegated leaves; a strong grower and quite hardy. 20 cts . each, $\$ 1.75$ per doz.
VIOLA. The violets are for the most part, among our first spring flowers. They furnish an abundance of bloom, a varicty of colors, and are so easily grown as to be worthy of a place in every wild garden.
V. Californica (California Violct). A large, single, bluc-flowered Violet, forming large clumps, very fragrant; needs a little proteetion in winter. It also makes a fine plant for window culture. 15 cts . cach, $\$ 1.25$ per doz.

Viola Canadensis. 因 Is 1 to 2 feet high, with heart-shaped leaves and whitish flowers tinged with purple. A moist, shady situation is desirable for its eultivation. May to August. 15 ets. each, $\$ 1.25$ per doz.
V. blanda (Sweet White Violet). $\otimes$ Flowers slightly fragrant. Damp, open places in spring. 10 cts. eael, $\$ 1.00$ per doz.
V. canina, var. sylvestris (Dog Violet). * A pretty, many-flowered Violet, 6 inehes high, blue in color, branehing and forming little elumps. Moist, shady plaees. 10 ets. each, $\$ 1.00$ per doz.
V. cucullata (Common Blue Violet). 困 A strong growing plant, from a thiekened or tuberous root; stemless, eaeh leaf and flower-stalk growing on a long stem from the root. Flowers deep or pale violet-blue or purple; single. Like nearly all our native V'iolets, it grows in damp places, mostly in shade. 10 ets. each, $\$ 1.00$ per doz.

Tiarella cordifolia (see page 48)
V. cornuta (Horned Pansy). An old garden plant of mueh merit, with sweet seented bright lavender flowers in spring; quite hardy in wet or very moist, open plaees. 10 ets. eaeh, $\$ 1.00$ per doz.
V. cornuta alba. A pure white varicty of good form; a great bloomer from spring through the season. 10 cts. eaeh, $\$ 1.00$ per doz.
V. odorata. .- The eommon Sweet English Violet. Single, but very fragrant. 20 cts. eaeh, $\$ 1.50$ per doz.
V. pubescens. ${ }^{*}$ Six to 12 inches high. Flowers yellow, veined with purple. This little Violet is found throughout New England, in rather dry soils, in shade, in carly summer. 10 cts. each, $\$ 1.00$ per doz.
V. rotundifolia. Low, 2 to 3 inehes high. A yellow Violet, with large, round leaves, flat on the ground, growing on moist, mossy banks near mountain brooks. Early spring. 10 ets. each, $\$ 1.00$ per doz.

Thatietrun ancmonoides (see page 47 )

Trillium sessile (see page 48)

Group of Trilliums (see page 48)

1. Trillium cernuums

6. Trillium grandiflorum

Veronica incana (see page 50 )

Veronica longifolia subsessilis (see page 50)

Viola pedata (Bird's-foot Violet). © Leaves all divided. Large, handsome, pale or deep purple or blue flowers in summer. Delights in a dry, sandy soil in open sun. Spring or early summer. One of the very best of our wild Violets and satisfactory to grow by reason of its great flower-bearing quality Fine large elumps. 20 cts. each, $\$ 1.50$ per doz.
V. pedata var. bicolor. $A$ variety with the two upper petals very much darker. in cts. each.
V. ?- © The little Violet found in old gardens, with bright yellow and purple flowers, sometimes ealled "Johnny-jump-ups." 10 ets. each, $\$ 1.00$ per doz.
V. septrentrionalis. An albino, growing 6 to 10 inches high in early summer; a strong vigorous grower, with masses of well-developed, dark green leaves. The flowers are white, with purple in the throat, standing up well above the leaves (not unlike the

Viola eucullata (see page 51)

Viola cornuta alba (see page ju)
Viola septrentrionalis eontinued
Canada Violet eolor) and covering the plant with its masses of bloom. It does execedingly well in the rieh, moist border or partially shady nook; not fragrant; forms large elumps. 15 ets. each, $\$ 1.50$ per doz.
YUCCA filamentosa (Adam's Needle). © The dark green leaves, 1 to 2 feet long, are elustered at the base, about an ineh wide in the center, running to a sharp point, the edges splitting off into little hairs 1 to 4 inehes long. The flowers are large, ereamy white, borne along the stalk near the top; 3 to 6 feet high. It is an evergreen and looks well through the winter. Too heavy for the mail. Not prepaid, 35 ets. eaeh.

Sarracenia flava (see page 57)

## Bog Garden

There are some very interesting specimens which belong to the class of bog plants.
The true lover of plants needs some of these sorts to make his collection completc. The Vcnus Fly-trap is in itself a curiosity. This little plant is so constructed as to catch flies when they alight on the modified leaf forms. Cypripediums, when seen growing as in the cut on the following page are a thing of great beauty. The Droseras and Sarracenias are plants which are very attractive to the lover of plant curiosities. Any one who has a wet spot can have one of these gardens containing such plants. When planting such plants, it is well to cover the ground with Sphagnum mossjust a thin covering. This will protect the foliage from mud spattering on the leaves during a hard shower. It will also prevent too rapicł cvaporation of moisture.

ACORUS Calamus (Sweet Flag). Grows in low, wet places. Leaves light green, 1 to 3 fect long. The root-stock has an aromatic flavor well known to people of New England. Desirable for shallow lakes and wet places. 15 cts. each, $\$ 1.50$ per doz.
CALLA palustris (American Calla). Similar to the cultivated sort, only smaller; easily grown in the bog. 10 cts . cach, $\$ 1.00$ pcr doz.

Dionea muscipula (see page 56)

d rolony of Cypripedium spectabile (see page - 5 .

Sarraconi:ィ Drummondii (see pare .j7)

CALTHA palustris (Marsh Marigold)." Six to 15 inches high. Flowers bright yellow in spring. A very showy plant in wet places, both in sun and shade. It can also be planted in brooks, water 2 to 4 inches decp; for massing, plant 1 foot apart. It can also be grown in pots for forcing. 10 cts. cach, $\$ 1.00$ per doz.; $\$ 6.00$ per 100 .
CALOPOGON. Sec Orchids.
CYPRIPEDIUM parviflorum. See Orehids.
C. spectabile. Sce Orchids.

DROSERA filiformis (Thread-leaved Sundew). A little bog plant, with long threadlike leaves, covered with short, red-colored hairs. Flowers rose-purple, along the upper part of the stem. Four to $S$ inehes high. Wet, sandy soils. 10 cts. each, $\$ 1.00$ per doz.
D. rotundifolia (Round-leaved Sundew). Found in wet, sandy places near water, in Splagnum moss, and in a bog. Leaves roundish, covered with red hairs. Flowers white. 10 cts . each, $\$ 1.00$ per doz.
D. longifolia. Similar to the above, only the leaves are narrower. Bog. 10 ets. each, $\$ 1.00$ per doz.
DIONÆA muscipula (Venus Fly-'Trap). A most wonderful plant. The flowers are small, white and quite pretty, but the wonder is eentered in the hairy-edged, roundish leaves, which are so sensitive that they quiekly elose if touched on the inside. Inscets are quite often eaught and elosely held until they die, when the leaf-trap again opens and is ready for more game. It is casily grown in wet or very damp sand, either in pots or in the open ground, in damp moss or bog. 15 ets. each, $\$ 1.25$ per doz.

HABENARIA ciliaris. Sce Orchids. H. blephariglottis. See Orehids. HELONIAS bullata (Stud-flower). A rare perennial, found in wet places southward with a few large, smooth leaves at the base. Flower-stalks 1 to 2 fect, with raceme of beautiful pink or purple flowers. Plant in a wet place or bog. 25 cts. cach.
IRIS Pseudacorus (Yellow Iris). Quite large, bright yellow flowers on stems 2 feet high. 20 cts. each.
JUNCUS effusus (Bog Rush). Stem round, dark green, 2 to 4 feet high, bearing near the top a cluster of small, inconspicuous flowers. Quite desirable for wet, marshy places, where it soon establishes itself, forming good clumps. 10 cts. each, $\$ 1.00$ per doz.
LOBELIA cardinalis. See Hardy Perennials.
MENYANTHES trifoliata (Buck Bean). A pretty little bog plant, growing in moss. Has large, pure white flowers, covered on the upper surface with frost-like beards in

Sarracenia variolaris early spring. Fine for the bog garden. 10 cts. each, $\$ 1.00$ per doz.
NESAEA verticillata. A pretty little water shrub, found along the margins of lakes in shallow water or wet ground, with elusters of small, rose-purple flowers. Leaves are brightly colored in autumn. Forms large clumps. 20 ets. each, $\$ 1.50$ per doz.
POGONIA ophioglossoides. See Orchids.
SABBATIA chloroides. A foot high, with very showy rose-purple flowers 2 inches broad. It delights in a moist, peaty soil, is quite hardy and easy to grow. New plants are formed around the old stalks like the cardinal flower, making it a perennial. 25 ets. each, $\$ 2.00$ per doz.

SARRACENIA purpurea (Pitcher Plant). This plant usually

Sarracenia rubra sends up a single flower-stalk: 6 to 15 inches high, bearing a single, deep purple flower an inch or more broad. Leaves pitcher-shaped, curved, ascending, 2 to 6 inches in length, greenish, with purple veins, or reddish purple. Plant in a wet place, keeping moss around the plant. The Sarraeenias are all fine bog plants. 15 ets. each, $\$ 1.25$ per doz.
S. flava (Trumpet-Leaf). Flowers and leaves yellow, the former 4 to 5 inches wide, leaves 2 feet long. This is one of the best fly-eatchers; often hundreds of inseets are found in a single pitcher. This is an easy one to grow in the bog. 20 ets. each, $\$ 1.50$ per doz.
S. Drummondii. Leaves 2 feet long, beautifully variegated; flowers 3 inches wide. Give this some protection through the winter. 20 cts. each, $\$ 2.00$ per doz.
S. psittacina (Parrot-beaked Pitcher Plant). Quite small and rare. 20 cts. each, $\$ 2.00$ per doz.
S. rubra. (Red-flowered Trumpet-Leaf). Pitchers redveined; flowers reddish purple. 20 cts. each, $\$ 2.00$ per doz.
S. variolaris. A smaller species from Georgia, with taller and more slender leaves. 20 ets. each, $\$ 2.00$ per doz.
SCIRPUS atrovirens. (Marsh Sedge). One to 3 feet high. Fine for moist or wet places. 10 cts. each, $\$ 1.00$ per doz.
SYMPLOCARPUS fæetidus. This is one of the earliest of the spring flowers. The covering for the yellow flowers is dull purple, showing above ground before the frost is gone. The large green leaves appear later and attain a height of 1 to 3 feet. 20 ets. each, $\$ 1.50$ per doz.

A glimpse of a monntain bor at an elevation of about $\bar{\sigma}, 000$ feet, bordered with balsams and spruces

TYPHA latifolia (Cat-tail). A plant found in wet plaees, growing 2 to 4 feet high. Leaves long, grass-like. Flowers grow in a spike. Good for wet, marshy plaees or quite moist soil. For massing, plant 2 feet apart. 15 cts. cach, $\$ 1.50$ per doz.
VACCINIUM macrocarpum (American Cranberry). The common cranberry of eommerce, casily grown in the bog or any moist situation. Good clumps 15 ets. caels, $\$ 1.50$ per doz., $\$ 6.00$ per 100 .
VERATRUM viride (American White Hellebore). Thrifty plants, with large, broad, green leaves, nearly a foot long. It grows 2 to 4 feet high, bearing many small, yellow, or greenish flowers at the top. At home in a moist or wet, blaek peaty soil. 20 cts. each; sceds, 5 cts.

## Shrubs Desirable for a Wet Place

These ean be planted where it is quite wet, or they will grow in any moist garden soil. Mlost of them are desirable for growing in masses. The following are usually found growing this way: Andromeda polifolia, Cassandra calyculata, and Ledum latufolium

Andromeda polifolia, 1 ft .
Azalea viscosa, 4 to 10 ft .
Cassandra calyculata, 1 ft .
Cephalanthus occidentalis, 4 ft .
Gaylussacia resinosa, 2 ft .
Ilex verticillata, 5 ft .
Kalmia angustifolia, 1 ft .
Kalmia glauca, 2 ft .
Ledum latifolium, 1 ft .
Nemopanthes Canadensis, 4 ft .
Pyrus arbutifolius, 5 ft .
Rhodora Canadensis, 2 ft .
Vaccinium stramineum, 3 ft .
Vaccinium corymbosum, 5 to 10 ft .

## Aquatic Plants

Plants grown in water 2 to 3 feet below the surfaee; always below the frost-line.

BRASENIA peltata (Water Shicld). An aquatie growing in 1 to 6 feet of water. Leaves entirc, floating, 1 to 3 inehes broad, greenish or purplish. Flowers small, dull purple, appearing on the water's surface. 10 ets. each, $\$ 1.00$ per cloz.
LIMNANTHEMUM lacunosum (Floating Heart). A pretty little aquatie, with blotehed leaves and white flowers all summer. Plant in water 2 to 5 feet deep. 10 cts. eaeh, $\$ 1.00$ per doz.
NASTURTIUM officinale (Hardy English Water Cress). A well-known hardy perennial aquatic, easily grown in any stream. Flowers white. 8 ets. caeh, 75 ets. per doz.
NUPHAR advena (Common Ycllow Lily). Has large leaves and single yellow flowers through the summer. Found in still water, 2 to 5 fect deep. Easily grown and execedingly ornamental and satisfaetory. 25 ets. eaeh, $\$ 2.00$ per doz.; by express, $\$ 1.50$.

Cypripedium parviflorum (see page 61)

NYMPHÆA odorata (Sweet-scented Water Lily). This plant is too generally known to need deseription. Its large, fragrant white flowers are well worth the trouble required in growing them. Where no pond or slow-flowing stream is near at hand the plant may be grown in a large tub partly filled with rich mud or elay, the roots planted in this and the lub filled with water. For planting in a lake, a stone ean be tied to the root and thrown to the place where they are to be grown, or pressed into the mud with a stick. Plant in water 2 to 5 feet, or below frost. They are very easy to establish. 20 cts each, $\$ 1.50$ per doz.
PELTANDRA Virginica (Water Arum). Leaves on long petioles, sometimes like a calla in outline, with greenish flowers, growing a foot or more out of the water. Plant in water, a foot deep in mud. 15 cts . each, $\$ 1.25$ per doz.
PONTEDERIA cordata (Piekerel Weed). Flowers blue; grows in water about a foot deep; quite often in sand, in ponds or slow streams. Flowers small but numerous, raised 8 to 12 inches above the water. Common throughout New England. For massing, plant 18 inches apart. 25 ets. eaeh, $\$ 2.00$ per doz.; by express, $\$ 1.50$ per doz.

## Hardy Orchids

The Orchids of New England, for the most part, are shade-loving plants, and delight in a soil well drained and largely composed of leaf-mold. While the common border plants are not particular as to soil they like the open sun and are exposed to the drying winds; but these littlc Orchids require altogether a different treatment, both in soil and position.

Cypripedium acaule (see page 60 )

We find them in the wild, usually in a soil composed largely of leaf-mold; the trees and rocks, the unevenness of the ground, low shrubs and ferns, all help to keep the air and soil cool and moist, and with but little circulation of the air. We add some bogmoss to the leaf-mold in making the bed for the smaller Orehids, raising the bed several inches to insure good drainage. Here Aplectrum, Goodyeras. Liparis, Orchis spectabilis. IIabenaria bracteata, II. Hookeri and Cypri-

Calopogon pulchellus

Goodyera pubescens (see page 61)
pedium acaule will thrive. A few of our native Orchids are really bog plants and desire more moisture, like Arethusa, Calopogon, IIabenaria blephariglottis, II. dilatata, II. hyperborea, Cypripedium spectabile and Pogonia ophoglossoides. Select a wet place where the surface is constantly saturated with water, building up a bed a little, and on top cover with moss 4 to 6 inches deep. Plant these Orehids in elean sphagnum. In this way we have had excellent success in growing them in shade.

APLECTRUM hyemale (Puttyroot). This plant sends up from a bulbous root late in summer a pointed green leaf, 2 to 6 inches long, which lasts through the winter, and in spring a stalk about a foot high bearing a raceme of large, greenish brown flowers. Rich, moist, shady places. 20 cts.
CALOPOGON pulchellus. Although this plant is more generally found in swamps and peat bogs, it also frequently grows in moist, sandy soil. It is a small bulb about the size of a large bean, which sends up in spring a long, grass-like leaf, and a stalk about a foot high, bearing in June and July two to six showy pink-purple flowers about an inch broad. 10 ets. each, $\$ 1.00$ per doz.
CYPRIPEDIUM acaule (Lady's-Slipper; Moceasin Flower). This is often ealled the Red Lady's-Slipper, but the flower is rose-purple in color. The plant sends up two broadish

## Cypripedium acaule continucd

green leaves from the base, and from between them comes a stalk about a foot high bearing a single large, showy flower. Plant in a well-drained soil, with some leaf-mold. This does quite wall in pots. 15 ets. each, $\$ 1.25$ per doz.; extra-strong clumps, 30 cts. each, $\$ 2.50$ per doz. (See eut. on page 59 .)
C. parviflorum (Small Yellow Lady's-Slipper). This is one of the very best of the hardy Orehids for cultivation, growing about a foot high; stem leafy, bearing at the top one or two very showy yellow flowers; fragrant. It does exceedingly well in a rich, shaded spot where leaf-mold has been added, and should be left undisturbed for several years. It will also thrive in the bog-garden, if not too wet. May to July. 20 cts. each, $\$ 1.50$ per doz.
C. pubescens (Large Ycllow Lady's-Slipper). Very much like Parviflorum, only the flowers arc larger. This should be planted in a rich bed in which leaf-mold should be a part, in some moist, yet well-drained, shady spot. It should grow stronger for several years if left undisturbed. May and June. 20 cts . each, $\$ 1.50$ per doz.; (See illustration from photograph below.
C. spectabile (Showy Lady's-Slipper). The fincst and most showy of all our Orehids. It grows about 2 fect high, bearing along the stalk scveral rather large, roundish leaves, and on top one or two quite large rose-purple or nearly white flowers. It is a bog-loving plant, yet does execedingly well in a moist, and partly shaded bed of peat or leaf-mold. It is also a good pot plant for the cool greenhouse, or where the air is not too warm or dry. Nothing can be morc charming than masses of this plant seen in a great eedar swamp, its natural home. Wc counted over 1,000 blossoms at one timc of this plant in our bog-garden last season, with several plants bearing three flowers on a stalk and many with two flowers. 2.5 ets. each, $\$ 2.50$ per doz.; strong clumps, (too heavy to mail), 50 cts. each; XX \$1.00.
GOODYERA pubescens (Rattlesnake Plantain). \& to 15 inches high; leaves clustered at the bottom, whitc, rctienlated. Stem leaftets, about a foot high, bearing a short spike of white flowers. Plant in a shady place, with leaf-mold. It does quite well under evergreens, where there is good drainage; also in the rock-garden. 10 cts. each, $\$ 1.00$ per doz.

Cypripedium pubescens

Habenaria ciliaris

GOODYERA Menziesii. A 'plant larger than Pubeseens and with leaves strongly marked with broad, white bands; very attraetive. It does quite well in a sheltered bed of leaf-mold, and also in a cool greenhouse, planted in leaf-mold and moss. 25 cts. cach, $\$ 2.00$ per cloz.
G. repens. Flowers white, leaves smaller and markings not so bright. A sheltered leaf-mold bed is the proper place to plant. 15 cts e each, $\$ 1.50$ per doz.
G. repens, var. Smaller than Repens, and the fine, hairlike markings of the leaf are quite distinct. Flowers white, 3 to 4 inches high. This is a bog-loving plant and does quite well planted in elean sphagnum, away from the water, but where it is constantly kept moist. 1.5 ets. each, $\$ 1.50$ per doz.

HABENARIA blephariglottis (White-Fringed Orehis). A rare and beautiful species found growing in sphagnum moss. 1 to 2 feet high, bearing at the top a spike of pure white fringed flowers. Rare. At home in the bog. 2.5 ets. eaeh, $\$ 2.00$ per doz.
H. bracteata. Plant about 8 to 12 inehes high, found in rich, moist shades, usually on mountain side; flowers greenish, small, several; leaf-mold soil. 15 ets. each, $\$ 1.50$ per doz.
H. eiliaris (Yellow Fringed Orchis). Growth similar to H. blephariglottis, but flowers are yellow and very finc. Takes readily to cultivation, and thrives niecly in moist garden soil or bog. 20 ets. each, $\$ 1.50$ per doz.
H. dilatata. Plant 1 foot high. Stalk leafy; flowers small, white, thickly eovering 6 to $\delta$ inches of upper part of stalk. Found in rieh, moist places in high mountains or bogs northward. Plant in moss in wet places. 15 ets. each, $\$ 1.50$ per doz.
H. hyperborea. 1 foot. Greenish flowers along upper part of stalk, same loeation as Dilatata. 20 ets. each, $\$ 1.50$ per doz.
H. Hookeri (Two-leaved Orehis). This plant has two large leaves growing flat on the ground, with a few small greenish flowers along the upper part of stalk. Found in well-drained leaf-mold, under evergreens. 20 ets. caeh, $\$ 1.50$ per doz.
H. ${ }^{-}$psycodes (Purple Fringed Orehis). Grows about $1 \frac{1}{2}$ to 2 fect high, in wet or quite moist soil of muck or leaf-mold bearing a spike of very showy purple flowers at the top. 20 ets. eaeli, $\$ 1.50$ per doz.
LIPARIS liliifolia (Twayblade). About 4 inehes high, bearing a short raceme of purplish flowers. Plant in a well-drained soil; a shady bank is preferable. 15 ets. each, $\$ 1.25$ per doz.
L. Lœselii (Green Twayblade). With greenislı flowers. This plant delights in a wet situation just at the edge of water. 15 cts . cach, $\$ 1.25$ per doz.
ORCHIS spectabilis (Showy Orehis). Leaves oblong, shiny, 4 to 5 inches long, near the ground. Stem 4 to 7 inehes high, bearing a few pink, purple and white flowers. A choice little Orehid at home in rieh, moist woods, usually near small mountain brooks; it likes a bed of leaf-mold. 15 cts. each, $\$ 1.25$ per doz.
POGONIA ophioglossoides. A little fibrous-rooted plant, ${ }^{\text {, found growing in sphagnum moss and }}$ wet places in leaf-mold. Flowers rose-colored or white. Stalk 4 to 10 inches high. 10 ets. each, $\$ 1.00$ per doz.
SPIRANTHES cernua (Ladies' Tresses). 'Grows 6 to 20 inches high. Leafy below, bearing at the summit a dense spike of white flowers. This plant us ually found in rather moist, open pastures or grassy places and is bencfited by a little mulching when planted in the border. 10 cts. eaeh, $\$ 1.00$ per doz.

Spiranthes cernua

Margaret Dickson rose

## Roses

In the following list of Roses only those are mentioned that are partieularly desirable on aceount of their hardiness, easy eulture and beautiful flowers. I offer large, flowering plants (too large for the mail). They should go by express or freight and are not prepaid.

Anne de Diesbach. Flowers large, erimson, fragrant. 35 ets.
Baby Rambler (Mine. Norbert Lavavasseur). This new Rose very mueh resembles the well-known Crimson Rambler, but is dwarf in habit, growing only about 18 inehes high, bearing good trusses of bright erimson flowers from spring until stopped by frost in autumn. Quite hardy. Strong plants, 35 ets.
Baroness Rothschild. Flowers large, light pink, deepening to rose, borne on long stems, and surrounded by fine elusters of dark green leaves. 40 ets.
Crested Moss. Deep pink buds, with mossy fringe and erested. A beauty. Fine plants. 50 ets.
Fisher Holmes. Deep, glowing erimson; large, full and of fine form. Very fragrant. 40 ets.
General Jacqueminot. This is probably the best known of all the Hybrid Perennials, and is without a rival in fragrance and riehness of color. Crimson. 40 ets.
Glorie Lyonnaise. A beautiful Rose, with leather-like foliage. Flowers ereamy white, shading to lemon at the center. Very double. 40 ets.
La France. A very popular Rose, large and beautiful, both in bud and expanded flower. Silvery rose in color, and delieiously fragrant. A great bloomer. 40 ets.
La Reine. A beautiful elear bright rose-color, large and full. Very hardy. A standard sort. 40 ets.
Louis Van Houtte. Rieh erimson, heavily shaded with maroon. Medium size, double and well formed. High perfume. 40 ets.
Madame Georges Bruant. This new, everblooming Rose inherits the beautiful foliage and hardiness of Rosa rugosa. Flowers double, in elusters, pure white, very fragrant; buds long and pointed. Blooms at intervals through the season; forms a stout, handsome bush. Hardy everywhere. 40 ets.
Margaret Dickson. A fine white hybrid of good form. Fragrant and quite hardy. 40 ets.
Madame Plantier. This grand variety stands at the head for general usefulness on aceount of its perfeet hardiness and fine bushy form. It is largely planted in eemeteries and exposed positions. The flowers are pure white, and are borne in great abundanec. 25 ets. each, $\$ 2.00$ per doz.
Mrs. John Laing. Soft pink, large and full. Very fragrant. A great bloomer and of first quality. 40 ets.
Paul Neyron. This is a Hardy Hybrid Perpetual, with very large, deep rose flowers. A strong grower, with very few thorns. Buds espeeially desirable. 40 ets.

Dorothy Perkins (see page 65)
Rubiginosa (English Sweetbricr). $\Lambda$ very hardy Rose, 4 to 6 feet high, with shining leaves whieh have a refreshing fragranee, and many small, pink, single flowers. Fruit orangeerimson, quite showy. Fine for hedges. Field-grown, 25 ets. eaeh, $\$ 2.00$ per doz.
ROSA rugosa. These Japan Roses are very hardy, rapid growers, attaining a height of 5 or 6 feet, rendering them available for impenctrable, ornamental hedges, for whieh purpose they are unexcelled. The foliage is rather thick in texture, and of the most glossy, luxuriant green. Flowers are large, single and most perfect in form, followed by large, bright red or golden apples.
R. rugosa rubra. Flowers very large, pink in color; fruit brilliant erimson. 25 cts.
R. rugosa alba. Lovely pearly white flowers and bright golden fruit. 30 ets.

Soleil d'Or (Golden Sun). This Rose, of reeent introduction, is quite hardy and varying in color from gold and orange to reddish gold, much larger and finer than Persian Yellow. Strong plants, 40 cts.
WICHURAIANA (New Japan Creeping Rose). A low, trailing speeies, its stems ereeping on the carth as elosely as an ivy, and forming a dense mat of very dark green, lustrous foliage. It is a rapid grower. The flowers are rather small, pure white, with golden yellow stamens. It is perfeetly hardy, and very desirable for creeping over walls or covering unsightly places. 25 ets. eaeh, $\$ 2.50$ per doz. The following are its hybrids:
South Orange Perfection. Flowers double. white, in masses, soft pink at the tips. 35 cts.
Manda's Triumph. Fine glossy foliage; large elusters of double white flowers; swectsecnted. 35 ets.
Universal Favorite. Foliage shining; flowers double, bright rose, fragrant. 35 ets.
Pink Roamer. A vigorous grower, with bright foliage; the flowers are single pink, with white centers; very fragrant. 35 cts .
Evergreen Gem. Flowers large, crearny white, quite double. Leaves dark green. 35 ets.

## Climbing Roses

Baltimore Belle. White, very double flowers in large elusters. The buds are slightly tinged with pink. 40 cts.
Crimson Rambler (The Hardy Japan Climbing Rose). This Rose was introduced in 1893, and has proved a decided novelty. It is a vigorous grower, making in some eases shoots 15 fect long in a scason. The flowers are small, but grow in large, glowing erimson bunches, measuring from 6 to 9 inches from base to tip; 300 blooms have been counted on one shoot. The flowers remain a long time in fine eondition. Seems to be well adapted to the entire country; should be in every collection. 50 cts .

Dorothy Perkins. Resembling Crimson Rambler in mode of growth; the flowers are double and of a beautiful shell-pink color; quite hardy. 40 cts.
Yellow Rambler. (Aglaia). This, like Crimson Rambler, is a very vigorous climbing Rose, bearing its yellow flowers in clusters and proving hardy. Large plants, 50 cts.
Pink Rambler. A hybrid between Rosa multiflora and General Jacqueminot. Flowers double, deep pink. Fragrant. 40 cts .
Setigera (Wild Prairic Rose). This is a hardy climbing Rose, with good-sized, single pink flowers. 35 cts .

## Hardy Vines and Creepers

Clematis Jackmani

AMPELOPSIS quinquefolia (Virginia Creeper). A well-known climber, very hardy and greatly used for climbing on stone. Forms a beautiful green covering and in autumn is brilliantly colored. It can also be used to cover dry places on the soil, forming there great mats. 20 cts . each, $\$ 1.50$ per doz.
APIOS tuberosa (Wild Bean). A pretty tuberous-rooted climber, with clusters of rich purple flowers. 10 cts . each, $\$ 1.00$ per doz.
CELASTRUS scandens (Staff Tree; Bitter-sweet). A twining shrub, its principal attraction being in its twining habit and orange-colored fruit, which is pretty and very ornamental in autumn. 15 cts . cach, $\$ 1.25$ per doz.
CLEMATIS coccinea (Scarlet Clematis). A pretty southern speeies, with large scarlet flowers. Hardy. 25 cts. each, $\$ 2.00$ per doz.
C. Jackmani. Flowers are very large, 4 to 6 inches in diameter, violet-purple and distinetly veined. A continual bloomer through the season. The standard sort. 50 cts .
C. paniculata. July to Scptember. "One of the finest of hardy climbers, with handsome foliage. Of very vigorous and rapid growth, producing in late summer dense sheets of medium-sized, pure white flowers of the most pleasing fragrance. This is a new, Japanese plant, perfectly hardy and finely adapted to use for any covering purpose." -J. W. Manning. 35 cts.
C. Virginiana (Virgin's Bower). Although quite common in many localities, it is one of the prettiest, both on account of its clusters of numerous white flowers and its featherytailed fruit in autumn. Banks of brooks and streams, climbing over shrubs. 20 cts. each, $\$ 1.50$ per doz.
LONICERA brachypoda. A very hardy, thrifty vine, with large green leaves that stay on through the winter. Especially desirable for planting near the sea. Flowers white and yellow. One of the very best climbers. 25 cts . each, $\$ 2.00$ per doz.

Lonicera brachypoda aurea. A varicty of the preceding, with leaves beautifully striped with yellow. 25 cts. each, $\$ 2.00$ per doz.
MENISPERMUM Canadense (Canadian Moonseed). A pretty vinc, with peltate lcaves and small white flowers. Fruit black, looking like frost grapes. 25 ets. each, $\$ 2.00$ per doz.
RUBUS hispidus (Running Swamp Blackberry). 10 ets. each, $\$ 1.00$ per doz.
R. Canadensis (Low Blackberry; Dewberry). Common in dry, sandy fields; running extensively, the edible fruit of excellent quality, ripening in August. 15 ets. each, $\$ 1.25$ per 100.
VACCINIUM macrocarpon (Large, or American Cranberry). Try it in the bog. 10 cts. each, $\$ 1.00$ pcr do\%.
VITIS æstivalis (Summer, or Pigeon Grape). A strong, tall, elimbing vinc with large leaves and small black berries, ripe in October. Southward. 25 cts. cach, $\$ 2.50$ per doz.
V. cordifolia (Winter, or Frost Grape). A very strong, vigorous vine, elimbing to the tops of tallest trees. Flowers in May or June. Very sweet-scented; berries small, blue or black, in good elusters, ripening after frost; rather sour. 25 cts. each, $\$ 2.00$ per doz.

Vitis Labrusca (Northern Fox Grape). Quite common in moist places near water. Blossoms in Junc. Berries are large, dark purple to amber-color, and of good flavor. Ripe in September or October. This is the edible grape of New England, and is improved by eultivation. 25 cts. each, $\$ 2.00$ per doz.

## Evergreen Shrubs and Trees

Shrubs and Trees are too large for the mail and sloould go by freight or express. We do not prepay charges on Shrubs and Trces.

Kalmia latifolia (see pare 69)

ABIES alba (White Spruce). Two to $2 \frac{1}{2}$ fect, 50 cts. each.
A. Canadensis (Hcmlock). A beautiful hardy evergreen, with graceful, drooping branehes. Desirable for open, exposed places, growing often 50 feet high. It is also one of the very best for hedge-planting and stands almost any amount of trimming. 25 and 50 cts .
A. balsamea (Balsam Fir). A tree with dark green leaves, a rapid grower, and well adapted for almost any place. It thrives in wet or boggy places, also on or near the tops of our higher New England mountains. 3 to 5 feet, 75 ets. each.
A. concolor (White Silver Fir). This, according to Dr. C. S. Sargent, is found in its native habitat, California, Orcgon, Southern Colorado, New Mexieo, ete.; grows from 100 to 250 feet high, with a trunk 4 to 6 fect in diameter; withstands the heat and drought best of all the Firs; a rapid grower and quitc desirable for cultivation in the eastern states; the leaves are long and showy. Plants about 1 foot high, 50 cts. each; 2 feet, $\$ 1.00$
A. Douglasii. 1 to 2 feet high. 50 cts. each.
A. nigra (Black Spruce). A dark evergreen tree, with short, stiff leaves. Can be grown in very wet ground. 25 cts. each; 3 fcet, 50 cts .
Abies Nordmanniana (Nordmann's Silver Fir). A hardy Fir from the Caucasus, sometimes growing 150 feet high. Foliage dark grcen and glossy, pyramidal in outline. A fine lawn tree. It does exceedingly well in Massachusetts. Plants 1 foot high, 50 ets. each.

Black Spruce in its mountain home (see page (ia)

ANDROMEDA polifolia. A
beautiful little evergreen, which takes readily to cultivation, forming? a compact mass of foliage 1 foot across and 10 or 12 inches high. Flowers bell or urn-shaped, pale pink or flesh-color in May. 25 cts . cach, $\$ 2.00$ per doz., $\$ 8.00$ per 100.

ARCTOSTAPHYLOS Uvaursi (Bearberry). A low creeping evergreen with small roundish leaves and white flowers. It delights in a dry situation, and is desirable for covering dry banks or rocky places. 25 cts. each, $\$ 2.00$ per doz.
CASSANDRA calyculata (Leather-Lcaf). A low, branching shrub, with nearly evergreen leaves, bearing in carly spring leafy racemes of small white flowers. It grows about a foot high, and usually is fuund in masses in bogs or wet, open places; it will thrive in the garden. 25 cts. cach, $\$ 2.00$ per doz., $\$ 8.00$ per 100 .
DAPHNE Cneorum. A low shrub, bearing an abundance of small, dark, glossy, cvergreen leaves. Along the branches, and from the ends of the branches are borne the little pink flowers in clusters, which are delightfully fragrant. It should have some protection in winter. It does exceedingly well planted in a partially shaded place among rocks. 35 cts . each.
EUONYMUS radicans. An evergreen with rather small leaves; desirable for running either on the ground or on walls. 1 foot. Used for planting in front of large shrubs. 2.5 ets. cach, $\$ 2.00$ per doz.
E. radicans variegata (Varicgated Creeping Euonymus). An evergreen creeper with beautiful variegated white, pink and golden-striped leaves. Fine for edging. Very prominent in winter. 1 foot. 2.5 cts . (ach, $\$ 2.00$ per doz.
JUNIPERUS communis (Common, or Prostrate Juniper). A prostrate evergreen shrub, appearing as if the center had been pinched out and the growth had concentrated in the branches. Each one pushes outward and up a foot or more, forming a miniature tree in itself, the whole plant forming a beautiful shrub. Strong plants, 35 cts.
J. communis, var. aurea (Golden Prostrate Juniper). A varicty with golden foliage the whole year; very choice, quite hardy. Strong, 50 cts.

Daphne cneorum

Cassandra calyculata, fine for massing (see page 68)

Juniperus communis, var. Hibernica (Irish Juniper). A tall shrub, often 30 feet high, with short glaueous green leaves; grows in the form of a column, of ten 5 or 6 feet high, and no more than 1 foot through in any part; quite hardy. Plants 2 feet high, 50 cts. each.
J. Virginiana (Red Cedar). A beautiful shrub or tree, with small, pointed leaves. A slow grower, but very hardy, adapting itself to almost any situation, from the tops of the rocky cliff to the sandy plain or moist hillside. Color varies from light to dark green and dull slate. 2 fect, 35 cts. each.
KALMIA angustifolia (Sheep Laurel). A low, evergreen shrub, 1 to 2 feet high, with light green leaves and quantitics of little saucer-shaped, crimson flowers in May and June. Of easy culture, forming little elumps. It ean be grown in the bog. 25 cts . each, $\$ 2.00$ per doz.
K. glauca (Pale Laurel). About a foot high, with little narrow shining leaves and large, show white to lilac-purple flowers. A pretty little shrub either for massing in border or in the bog-garden. Plant 1 foot apart. 25 cts . each, $\$ 2.00$ per doz.
K. latifolia (Calieo Bush; Mountain Laurel). An evergreen shrub, growing luxuriantly along our mountain sides, forming large patches; or in single, round-topped specimens in moist, open fields, the dark, shining leaves giving a brightness to the landscape. In May and June the gorgeous coloring of the large rose or white flowers lend an enchantment to the picture that one will not soon forget. It is of casy culture in almost any situation. 1 to $1 \frac{1}{2}$ feet, 50 cts . each, $\$ 4.00$ per doz.; $1 \frac{1}{2}$ to 2 feet, $\$ 1.00$ each; 2 to 3 fect, $\$ 1.50$ each.
LEDUM latifolium (Labrador Tea). A dwarf evergreen, 1 to 2 feet high, with handsome heads of white flowers. Leaves with revolute margins, covered underneath with yellow wool. This is found in bogs, growing in sphagnum moss, and can be planted there, or in any garden soil somewhat moist. For clumping, plant about 8 inehes apart. 25 cts. each, $\$ 2.00$ per doz.
LEUCOTHOE Catesbæi. A fine evergreen shrub, 2 to 4 feet high, with deep, glossy green foliage; flowers white, in showy spikes. Easily handled in a moist, shady place. 25 ets. each, $\$ 2.00$ per doz.
PICEA excelsa (Norway Spruce). A well-known evergreen, with long, drooping branches, 1 foot, 20 ets. cach.
P. excelsa Finidonesis. With silvery white leaves. $1 \frac{1}{2}$ to 2 fect, XX, 75 cts. each.
P. pungens (Colorado Blue Spruce). A very hardy Spruce, with rather stiff branches. Foliage dense and varies in color from deep green to bluc or silvery white. A very

Picea pungens, continued.
beautiful tree, sometimes found 150 feet high. 2 fect, $\$ 1.00$ each, 3 fect, $\$ 2.00$ each.
P. pungens glauca. Fine selected blue. 2 to 3 fect, $\$ 3.00$ each.
P. pungens, var. Kosteriana (Koster's Blue, Grafted). Makes a fine specimen. 2 to $2 \frac{1}{2}$ feet, $\$ 3.00$ each; $2 \frac{1}{2}$ to 3 feet, $\$ 5.00$ each.
PINUS Strobus (White Pine). A tall, handsome tree, green all the year. A rapid grower, making a fine ornamental tree. Plants 2 feet high, 2.5 ets. each.

Juniperus Virginiana (see page 69)

Picea pungens var. Kosteriana

RETINOSPORA (Japan Cypress). Evergreen tree, desirable for lawns well proteeted from winds. We get fine sprays and colors in this choice Cypress.
R. filifera. Dark green foliage, with the ends of the branehes thread-like and drooping. 3 to 4 fect, $\$ 2.00$ each.
R. pisifera. A charming shrub with finely cut foliage and long, drooping branches. $1 \frac{1}{2}$ to 2 fect, 50 cts. cach.
R. pisifera aurea. A varicty of the above with golden tipped branches. $1 \frac{1}{2}$ to 2 feet, 50 ets. each; 2 to 3 fect, $\$ 1.00$ each; 3 to 4 fect, $\$ 2.00$ cach.
R. plumosa aurea. A varicty of the above, with the leaves golden tinted. Very thrifty. $1 \frac{1}{2}$ fect, 60 ets. each; $1 \frac{1}{2}$ to $2 \frac{1}{2}$ fect, $\$ 1.00$ each.

RHODODENDRON punctatum. A hardy species, flowering when but 2 or 3 feet high, bearing pretty rose-colored flowers spotted within. Small plants, 2 fect high, $\$ 1.00$ cach.
R. Catawbiense. This is the very best of our native rhododendrons, being perfectly hardy in New England and bearing in Junc large clusters of lilac-purple flowers. It forms symmetrical bushes 4 to 6 feet high and for mass planting it has no equal. 1 to $1_{2}^{\frac{1}{2}}$ fect, 50 cts. each; Nurscry grown clumps, $1 \frac{1}{2}$ to 2 fect, $\$ 1.25$ each; . 2 t.o 3 fect, $\$ 1.75$ each.
R. maximum (Great Laurel). An evergreen shrub, 5 to 30 feet high, with dark green leaves 4 to 10 inches long. Flowers white, pink or purple, greenish in throat and spotted with yellow or red. Takes readily to cultivation. July. Nursery-grown, with a good ball of earth attached. 9 to 12 inches, 30 cts. each; 2 to 3 foot clumps, $\$ 1.75$ cach; 3 to $3 \frac{1}{2}$ foot clumps, $\$ 2.25$ each. Holland grown maximum with many flower buds, $1 \frac{1}{2}$ fect, 10 to 18 buds, 75 cts . each; 2 fect, 15 to 25 buds, $\$ 1.00$ each; $22_{2}^{1}$ fect, 20 to 30 buds, $\$ 1.25$ each.

Irish Juniper (see page 69)

Group of Retinospora (see page 70)

## Hybrid Rhododendrons

Rhododendron punctatum (ses page 71)

We have imported from Holland a few varicties of hardy hybrid Rhododendrons. These varieties we have sclected from a large stock, and consider them the best for this climate. Each plant is a perfect specimen in itself. They have been given plenty of room and have formed broad dense heads. The flower clusters on these are larger than those found on our natives. Some clusters will measure 6 inches in diameter. All of our plants will bloom this spring. They will stand from 18 to 24 inches; cach one possessing from 10 to 20 flower buds. Pricc, $\$ 1.25$ each.

Atrosanguineum,(Richblood red).
Album grandiflorum (Blush, changing to white).
Boule de Niege (Pure whitc, very dwarf).
Caractacus (Deep crimson).
Charles Dickens (Dark red, spotted brown).
Everstianum (Rosy lilac).
Old Port (Plum color).
Parson's Gloriose (Rosc white).
Catawbiense grandiflorum.
TAXUS baccata, var. Canadensis (Ground Hemlock). A low, evergreen shrub, about 1 foot high. Plant in the shade of other taller shrubs or trecs. 2.5 ets. each, $\$ 2.00$ per doz.

THUYA occidentalis (Amcrican Arborvitæ). A well-known plant found in wet places, usually in swamps in northern New England, Canada, etc.; has been largely used for hedge purposes and for single specimens. It bears severe trimming. Plants 1 to $1 \frac{1}{2}$ feet high, 25 ets. each.
T. occidentalis Ellwangeriana. A beatiful form of Arborvitæ, with very short, dark green leaves. Plants 1 foot high, 50 cts . each.
T. occidentalis globosa (Globose Arborvite). A low form of dense, globe-shaped bush about 1 foot, 50 cts. each.
T. occidentalis, Little Gem. Quite dwarf, growing broader than high. S inches, 50 cts . each.
T. occidentalis Hoveyi. 1 to $1_{\frac{1}{2}}$ fect, 50 cts . each.

VACCINIUM Vitis-Idæa (Cowberry). A little, low tufted evergreen 3 to 5 inches high, with shining leaves; found in high mountain bogs; flowers are small, white, followed by small. dark red berries; a pretty plant for moist shady places. 25 cts. each, \$2.00 per doz.

## Deciduous Shrubs and Trees

Shrubs and trees are ton large for the mail and should go by freight or express.
AMELANCHIER Canadensis (Shadbush). Often 30 feet high. One of the first to flower. Flowers numerous, white, in pretty racemes. 25 cts. each, $\$ 2.00$ per doz.
AZALEA arborescens (Smooth Azalea). Flowers large, pure white and fragrant. 1 to $1 \frac{1}{2}$ feet, 50 ets. each; $1 \frac{1}{2}$ to 2 feet, $\$ 1.00$ each.
A. calendulacea (Flame-colored Azalea). This shrub is a native of the southern states, growing from 3 to 10 feet high, bearing a profusion of beautiful orangecolored, lemon, or fiery red flowers. Hardy. 1 to $1_{2}^{\frac{1}{2}}$ feet, 40 ets. cach, $\$ 2.50$ per doz.
A. nudiflora (Purple Azalea). This is one of the finest of our native shrubs, growing from 2 to 10 fect high, in dry woodlands and swamps, forming clumps. The tubular flowers are very showy, varying from almost white and flesh-color to pink or purple. 2.5 cts . cach,

Thuya occidentalis globosa (see page 72) $\$ 2.00$ per doz.; extra strong, 50 cts. each, $\$ 4.00$ per doz.; strong clumps, $\$ 1.00$ each.
A. Vaseyi (Rhododendron). But recently discovered on the mountains of North Carolina. It grows quite tall and seems to respond to cultivation readily, adapting itsclf to almost any situation, the flowers varying from light pink to deep rose-color, mottled at the base inside. Hardy in New England. The leaves take on beautiful tints in autumn, which give a new charm to this class of plants. 12 to 18 inches. 50 cts . each.
A. viscosa (Sweet White Honeysucklc). Grows 4 to 10 feet high with white or slightly rose-tinged flowers; very fragrant. This shrub takes readily to cultivation, forming fine, large clumps. Niee plants with bloom buds, 1 to $1 \frac{1}{2}$ fcet, 40 cts. each, $\$ 2.50$ per doz; 2 to 3 fcet, bushy, 75 cts. each.
BERBERIS purpurea (Purple Barberry). A very choice variety, with deep purple foliage throughout the season. Fine for hedgework. 2.5 cts . each, $\$ 2.00$ per doz.
B. Thunbergii (Thunberg's Japan Barberry.) A low bush, with shining foliage and showy flowers. Fruit deep erimson, persistent through the winter. Fine as single plants or for a low hedge. 25 cts. each, $\$ 2.00$ per doz.; extra heavy, 50 ets. each, $\$ 3.50$ per doz. Can supply smaller stock for hedgework in quantity.
B. vulgaris (Common, or European Barberry). Handsome, upright shrubs, forming large clumps. Flowers handsome, yellow, in drooping racemes. Onc of the very best hedge plants. 25 cts. each, $\$ 2.00$ per doz.
CEANOTHUS Americanus (New Jersey Tea). A low, branehing shrub, 1 to 2 feet high, bearing spreading panieles of white flowers. 25 cts . each, $\$ 2.00$ per doz.
CERCIS Canadensis (Ameriean Judas Tree). A small tree, with heart-shaped leaves, bearing its pink flowers in great profusion in early spring. 25 ets. and 50 ets. each.
CLETHRA alnifolia (Sweet Pepper Bush). Flowers creamy white, very fragrant. Grows 3 to 5 feet high. 25 cts. each, $\$ 2.00$ per doz.
COMPTONIA asplenifolia (Sweet Fern). A low shrub, with swcet-seented foliage. 15 cts. each, $\$ 1.25$ per doz.
CORNUS (Dogwood).
C. alternifolia (Green Osier). A shrub-like tree, 8 to 20 feet high, with wide-spreading branches and a flat top. Flowers pale yellow or white; fruit deep blue. 25 cts. eaeh, $\$ 1.50$ pcr doz.
C. circinata. Five to 8 feet high, with large white flowers; fruit light blue. One of the prettiest in cultivation. Leaves larger than in any other speeies. 25 cts. each, $\$ 2.00$ per doz.

Retinospora plumosa aurea (see page 70)

Cornus florida(Flowering Dogwood) A large shrub or tree, often 30 fect high. Flowers white. Very showy in flower and fruit. Fine plants. 25 cts. each, $\$ 2.00$ per doz.
C. Mas (Cornelian Cherry). Has quantities of yellow flowers in carly spring, followed by brilliant crimson edible fruit. $1_{\frac{1}{2}}$ to 2 fect, 25 cts. each.
C. paniculata. Grows 4 to 12 feet high; bark gray. 25 cts. each.
C. sericea (Silky Cornel). A shrub 3 to 10 feet high, with purplish bark, white flowers and pale blue fruit. One of the latest to flower. 25 cts. each, $\$ 2.00$ per doz.
C. stolonifera (Red Osier). Handsome in winter on account of its bright reddish purple bark. 25 cts. each, $\$ 2.00$ per doz.
C. Golden-leaved. A hardy sort, with dark red branches and golden-marked leaves, forming fine symmetrical bushes. 25 cts. each.
CORYLUS Americana (Wild Hazelnut). A shrub 3 to 6 feet high. Flowers in eatkins in early spring. 20 cts. each, $\$ 1.50$ per doz.

Rhododendron maximum with landscape (see page 71)

DIRCA palustris (Moosewood; Leatherwood). Shrub 2 to 5 feet high. Flowers light yellow, preceding the leaves. 25 ets. each, $\$ 2.00$ per doz. XX, 50 ets. each.
DIERVILLA trifida (Bush Honeysuckle). A little low shrub, with pale yellow flowers and ovate-pointed leaves. Clumps, 25 ets. each, $\$ 2.00$ per doz.
FORSYTHIA suspensa (Weeping Golden Bell). A beautiful shrub, with drooping branches. Flowers yellow; quite showy. 25 ets. each, $\$ 2.00$ per doz.
F. viridissima. Flowers light yellow, in great abundance along the branches. 25 ets. each, $\$ 2.00$ per doz.
GAYLUSSACIA frondosa (Dangleberry). A handsome shrub abont 3 feet high, with striped bark and rather small green leaves. The flowers are greenish white, borne on long stems, followed by the large, delieious blue berries. Easily grown in moist soils. 25 cts. each.
G. resinosa (Black Huckleberry). The common Huekleberry of our woods, Very sweet fruit. Grows abont 2 fect high. 25 ets. each, $\$ 2.00$ per doz.
HAMAMELIS Virginica (Witeh-Hazel). A tall shrub with oval or obovate leaves. It flowers in autumn about the time the leaves begin to fall and matures its fruit the next season. 25 cts. each, $\$ 2.00$ per doz.
HYDRANGEA arborescens (Wild Hydrangea). The earliest of this genus to flower. A vigorous shrub 4 feet high, with flat eymes of yellow-white flowers. 25 cts . each, $\$ 2.00$ per doz.
H. radiata. A thrifty shrub from the southern Allegheny mountains, with white flowers similar to the above. The leaves are large, dark green on the upper surface, and woolly white on the lower side. -The beauty is diselosed with every breeze, by turning a leaf here and there, and showing the woolly white against the baekground of dark green. Hardy. Forms good elumps. 25 ets. each, $\$ 2.00$ per doz.

A planting of rhododendrons in woods

Azalea viscosa, 2 years (see page 73 )

Hydrangea grandiflora. The showiest of autumn-blooming shrubs. Great heads of creamy white flowers turning to shades of red. It blooms late in the season, when most other shrubs arc past blooming. 50 cts . each, $\$ 4.00$ per doz.; heavy, 75 cts. and $\$ 1.00$ each.
HYPERICUM patulum (Spreading St. John's Wort). Low, 6 to 10 inches, spreading; flowers large, yellow, quite showy. July. 20 cts. each.
ILEX verticillaris (Black Alder, or Winter Berry). A native shrub, bearing in autumn beautiful scarlet berries, which stay on until well into winter. 25 cts. each, $\$ 2.00$ per doz.; strong clumps, 50 cts. each, $\$ 4.00$ per doz.
LAURUS Benzoin (Spice Bush). Grows 6 to $1^{5}$ inches high with large, oblong-ovate leaves; it forms fine bushy clumps, literally covered with small, spicy yellow flowers in early spring, followed by the rather large, red berries which cling to the twigs until quitc late in the autumn. 25 cts. each, $\$ 2.00$ per doz.
LIGUSTRUM vulgare (Common Privet). Forms fine clumps. Flowers white, followed by black berries. 25 cts.
LONICERA ciliata (Fly Honeysuckle). Shrub 3 to 5 feet high. Flowers, greenish ycllow. 20 cts . each, $\$ 1.50$ per doz.
MYRICA cerifera (Baybcrry or Wax Myrtle). 3 to i) feet high, forming good clumps, with rather small, dcep green, shining leaves, having a rich fragrance. Takes readily to cultivation cven when planted on the seashore. 25 cts . each, $\$ 2.00$ per doz.
M. Gale (Sweet Galc). Grows 4 feet high. The flowers come out before the leaves. Foliage bright grcen and fragrant. Does nicely near water. 25 cts. each, $\$ 2.00$ per doz.
NEMOPANTHES Canadensis (Mountain Holly). A medium-sized shrub, with bright red berries in autumn. 25 cts . cach, $\$ 2.00$ per doz.; XX, 50 cts. each, $\$ 4.00$ pcr doz.
PHILADELPHUS grandiflorus (Large-flowering Syringa). A rapi(l-growing shrub. 25 cts.
PYRUS arbutifolius. A shrub with small, shining lcaves, beantifully tinted in autumn. 25 cts. each.
RHODORA Canadensis. A low shrub, with showy rose-purple flowers, which precede the leaves in May. 25 cts. each, $\$ 2.00$ per doz.; heavy stock, 35 cts. each, $\$ 3.00 \mathrm{pcr}$ doz. RHUS aromatica (Fragrant Sumac). A straggling bush, seldom 3 feet high. Flowers pale yellow, fruit red. 25 cts . each, $\$ 2.00$ per doz.
R. copallina (Dwarf Sumac). From 2 to 4 feet high. Lcaves very highly colored in autumn. 25 cts. each, $\$ 2.00$ per doz.
R. glabra (Smooth Sumac). Branches smooth; leaves red in autumn. Forms a bush 10 to 12 feet high. 25 cts. each.
R. typhina (Common Staghorn Sumac). Mode of growth similar to R. glabra. The branches are covered with fine hairs. Leaves fine in autumn. 20 cts. each, $\$ 1.50$ per doz.
R. typhina laciniata. With finely cut leaves. 25 cts . each, $\$ 2.00 \mathrm{pcr} \mathrm{doz}$.

RIBES aureum (Missouri Currant). Flowers ycllow, in racemes; quite fragrant. The lcaves are highly tinted in autumn. 25 cts. each.
R. Cynosbati (Wild Gooseberry). Flowers greenish; berries quite large. $2 \overline{5}$ cts. each, $\$ 2.00$ per doz.
R. fioridum (Wild Black Currant). Flowers yellow; currants black and edible. 25 cts. each, $\$ 2.00$ per doz.
R. prostratum (Fetid Currant). Leaves showy in autumn. For rocky places. 20 cts. each.
ROSA blanda (Early Wild Rose). Grows 1 to 3 feet high. Flowers light rosecolor. 25 cts. each, $\$ 2.00$ per doz., $\$ 10$ per 100.
R. Carolina (Swamp Rose). A native Rose, found in wet or moist places. From 4 to 10 feet high. 25 cts. each, $\$ 2.00$ per doz.
R. lucida (Dwarf Wild Rose). Seldom over 18 inches high. Flowers rose-color.

Azalea calendulacea (see page 73) 25 cts. each, $\$ 2.00$ per doz., $\$ 10$ per 100 .
R. nitida. 18 inches high, with narrow, bright shining leaves and rose-colored flowers. 30 cts .
RUBUS odoratus (Flowering Raspberry). This shrub is a very pretty one in cultivation. Handsome, dark purple, clustered flowers. 25 cts. each, $\$ 2.00$ per doz.
R. delicious (Rocky Mountain Flowering Raspberry). A fine shrub, 3 to 4 feet high, with very large, white flowers. 25 cts . each, $\$ 2.00$ per doz.
R. occidentalis (Black Raspberry). The wild black Raspberry so well known to every one in New England. 20 cts. each, $\$ 1.50$ per doz.
R. strigosus (Red Raspberry). This is well known for its fruit in New England. 20 cts. each.
R. villosus (High Blackberry). The common high-bush Blackberry of New England. Fruit ripens in August and Scptember. 3 to 6 feet. 25 cts. each, $\$ 2.00$ per doz.
SAMBUCUS pubens (Red-berried Elder). Flowers in broad cymes, white; fruit crimson, in large bunches, very showy. 25 cts . each, $\$ 2.00$ per doz.
S. Canadensis (Common Elder). A very beautiful shrub, flowering at a time when most other shrubs are past their bloom. Flowers white. 25 cts. each, $\$ 2.00$ per doz.
SPIREA (Meadow Sweet).
S. Anthony Waterer. A low shrub, 1 to 2 feet high; a great bloomer from early spring to late autumn. Flowers crimson; very hardy. 25 cts. each.
S. opulifolia. Pretty shrub; flat heads of white flowers. 25 cts. each, $\$ 2.00$ per doz.
S. opulifolia aurea (Golden Spirea). 25 cts. each.
S. salicifolia. Flowers in a crowded panicle, white or flesh-colored. 2 or 3 feet high. 15 cts. each, $\$ 1.50$ per doz.
S. tomentosa (Steeple Bush). Stems and lower surface of the lcaves very woolly. Flowers crowded in a dense panicle, rosc-color. 15 cts . each, $\$ 1.50$ per doz.
S. Thunbergi (Thunberg's Spirea). In early spring the plant is literally covered with small white flowers. The foliage is light green, changing in autumn to the most bcautiful shades, making it one of the most beautiful foliage plants in cultivation. 25 cts . each, $\$ 2.00$ per doz. XX, 50 cts . each.

78 Edward Gillett, Soutlwick, Mass.-Shrubs and Trees

Gaylussacia resinosa in fruit? (see page 75)

Rhus typhina laciniata (see page 76)

Spirea Van Houttei (see page 79)

Berberis purpurea near the house (see page 73)
Spiræa Van Houttei (Van Houtte's Spirea). The leaves of this varicty are oval and toothed at the end, rich green in eolor and, like the above, most beautiful in autumn tints. Flowers pure white, in clusters along the whole length of the branches. 25 cts . each, $\$ 2.00$ per doz.; heavy, 50 cts. each.
SYMPHORICARPUS racemosus, (Snowberry). A fine shrub 2 to 4 fect high of vigorous growth bearing small rose-colored flowers in June and July; followed by large pure white fruit, remaining into the winter. Will also thrive in deep shady places. 25 cts .
S. vulgare (Indian Currant, Coral Berry) 2 to 3 fect high, of graceful habit, bearing sinall pink flowers in August and September followed by the red coral-like berries which cover the drooping branches and stay on well into the winter. 25 cts.
SYRINGA Japonica (Japan Lilac). A fine lawn tree, with glossy green leaves and large bunches of pure white flowers in June. Strong plants, 50 cts. each.
S. vulgaris. A fine grower, well known in eultivation; flowers purple, quite fragrant. 2.5 cts. Large heavy clumps $\$ 1.00$ to $\$ 1.50$ each.

VACCINIUM Pennsylvanicum (Dwarf Blueberry). Six to 10 inches. Berries abundant, large and sweet, ripening early in July. Forms large patches in dry, exposed places. 20 cts. each, $\$ 1.50$ per doz.
V. vacillans (Low Blucberry). The Blueberry of our woods. From 1 to 2 feet high. Branches yellowish green. 25 cts. each, $\$ 2.00$ per doz.
V. corymbosum (Common, or Swamp Blueberry). Tall, 5 to 10 feet high. This yields the common Swamp Blueberry, so well known in our market, and is not hard to grow in moist garden soil. 25 ets. each, $\$ 2.00$ per doz.; heavy clumps, 50 cts . to 75 ets. each.

VIBURNUM (Arrowwood).
V. acerifolium (Maple-leaved Arrowwood). Grows 3 fcet high; compact in habit. Flowers white; leaves highly colored in autumn. 25 cts. each, $\$ 2.00$ pcr doz.
V. cassinoides. One of our handsomest northern shrubs. Grows 6 to 10 fcet high, with broad flat cymes of yellowish flowers. Easily cultivated and blooms in great profusion. 25 cts . each, $\$ 2.00$ per doz.; heavy stock, 50 cts . cach, $\$ 4.00$ per doz.
V. lantanoides (Hobble Bush). Grows 4 to 6 fect high. Leaves round, ovate, 4 to 5 inches wide, highly colored in autumn. Flowers in broad, scssile cymcs. Very handsome. Delights in a moist, shady place. 25 cts. each.
V. Lentago (Shcepberry). Flowers crcamy whitc, in broad, flat scssile cymes, 4 to 5 inches broad. A large shrub or tree, sometimes 30 fcet high. 25 cts . each, $\$ 2.00$ per doz.; extra heavy, 50 cts. each, $\$ 4.00$ per doz.
V. Opulus (Cranberry Trec). Grows 5 to 10 feet high, with showy white flowers. Fruit bright red, remaining after the leaves are gone. 2.5 cts. each, $\$ 2.00$ per doz.
V. Opulus sterilis (Snowball). Well known in cultivation. 25 cts. each.
V. pubescens (Downy Arrowwood). A compact shrub, 2 to 3 fcet high. Has rigid branches and ovate leaves, tapering to a point. Produccs in great profusion flat cymes of white flowers. Quite hardy, and is a bcautiful plant in cultivation. 25 cts . each, $\$ 2.00$ pcr doz.; clumps, 50 cts. each.
V. tomentosum. Eight to 10 fect. Flowers showy, in flat cymes, purc whitc. Leavcs large, rich grecn. 25 cts. cach.
XANTHORRHIZA apiifolia (Ycllow Root). A low shrub, with dark-colorcd flowers; forms finc clumps. Especially desirable for planting under trecs or for bordering walks or roadways. The orange coloring in autumn is very marked. 25 cts. each; $\$ 2.00$ pcr doz., $\$ 10$ per 100 .

## Collections of Flowering Plants

We can make up collections of flowering plants suitable for almost any place where plants will grow. Open sun dry places, open sum moist places, moist shade, dry shade, hillside, brooks, lakes, rock-gardens, etc.

These collections are not sent 'with express or freight charges paid. Please give the position for which they are needed, that we may know what varieties to send. Also state whether low or tall-growing varicties are desired.
